BOARD OF SUPERVISORS

MONDAY, JANUARY 5, 1925, 2 P. M.

In Board of Supervisors, San Francisco, Monday, January 5, 1925, 2 p. m.

The Board of Supervisors met in regular session.

CALLING THE ROLL.

The Roll was called and the following Supervisors were noted present:

Supervisors Bath, Colman, Deasy, Harrelson, Hayden, Katz, McGregor, McLeran, McSheehy, Morgan, Robb, Roncovieri, Rossi, Schmitz, Shannon, Welch, Wetmore—17.

Absent—Supervisor Badaracco—1.

Quorum present.

Acting Mayor Ralph McLeran being absent, Supervisor Hayden was called to the chair.

APPROVAL OF JOURNAL.

The Journal of Proceedings of the previous meeting was laid over for approval until next meeting.

ROLL CALL FOR PETITIONS FROM MEMBERS.

Supervisor Shannon Welcomed By the Board.

Supervisor Shannon appeared in the meeting today for the first time since he was taken ill. Applause from members of the Board and citizens present greeted his entrance after an absence of several months.

Acting Mayor McLeran, as spokesman, expressed the pleasure of the Board in welcoming him back to his seat among them, and stated that he hoped he would be able to continue to attend the meetings and do his duty in the able manner in which he has in the past for the good of San Francisco.

Supervisor Shannon expressed his thankfulness for his recovery from the long serious illness and for the kindness shown to him during his illness.

He congratulated the citizens on

the vote at the recent election to authorize the ten million dollars worth of bonds for the Hetch Hetchy project.

Bus Service Requested.

The following were presented and read by the Clerk:

Communication from the Federation of Women's Clubs asks for a bus service from the termination of the street car line to the Palace of the Legion of Honor. They state that there will be art meetings and other meetings at the building and that transportation facilities should be provided.

Referred to the Public Utilities Committee.

Protest Against Increased Pay.

Protest from Builders' Exchange against allowing the demand made for common labor of \$6 instead of \$5.50 per day, on the ground that the present schedule of common labor is \$4.50 per day; that at the present time there are plenty of laborers working for \$4.50 per day and if the increase is granted it would create a great deal of unrest among the laborers.

Referred to the Finance Committee.

Increase Asked for Railway Employees.

Communication from the Street Railway Employees' Union in reference to the request for an increase of \$1 per day for street car employees

Referred to the Public Utilities Committee.

Telegram.

The following was presented:

A. P. Jacobs, 101 Washington street, San Francisco, Cal.

San Francisco awarded first prize cities of its class, 1924. National Apple Week board of judges. Trophy will be forwarded in due course. On behalf of officers and members of this association wish to thank you and your associates for your wonderful contribution to apple publicity. Hearty congratulations.

Read by the Clerk and spread at length in the Journal.

Relative Progress on Evaluation Proceedings Before the Railroad Commission.

In response to request of the Board of Supervisors at a previous meeting. Mr. John Dailey filed a written report on the progress made by the State Railroad Commission in the work of placing a valuation on the properties of the Pacific Gas and Electric Company and the Great Western Power Company. This he supplemented by verbal statements and answers to questions propounded by various Supervisors.

Mr. Daley was requested to make a progress report to the Board every two weeks.

On motion of Supervisor Colman the Public Utilities and Finance committees were requested to examine into the question of the Hetch Hetchy power and to bring in a recommendation at as early a date as possible, as to the disposal of the power when it gets here April 1, 1925.

Discussion.

The discussion in connection with the foregoing follows:

After the transaction of other business the following proceedings were had concerning communications from the Board of Public Works and the Railroad Commission in regard to evaluation proceedings of the properties of the Pacific Gas and Electric Company and the Great Western Power Company.

The Clerk (reading): January 2, from the Railroad Commission, addressed to the Board, attention Clerk.

"Replying to yours of December 29, re progress of evaluation of the Pacific Gas and Electric Company and Great Western Power Company, we are enclosing herewith copy of a letter already prepared, at the request of Mr. John J. Dailey, Special Counsel of the City, as this appears to cover the information you desire. Yours very truly, Railroad Commission, per Harry G. Matthewson, Secretary."

"Replying to yours," dated December 31—replying to your request December 29, 1924, for progress on the report for the evaluation of the properties of the Pacific Gas and Electric Company and Great Western Power Company, we take pleasure in submitting to you the following: This report refers to the inventory and appraisal work of the physical properties of the Pacific

Gas and Electric Company and the Great Western Power Company within the City of San Francisco, as covered by application 9767 and 9768 before this Commission. This report covers the progress up to December 31, 1924. From March 5, 1924 when the work was commenced, to December 31, 1924, approximately 11,000 man-days of labor have been used on this appraisal, and approximately 55 per cent of the work of appraisal by the Commission's engineers of the properties mentioned in these applications has been completed. The result for each company concerned is as follows:

Pacific Gas and Electric Company.—Per cent of total, 73.75; per cent completed, 54; man days, 7965. To be completed, 46 per cent; man days, 6785. Total man days, 14,750.

Great Western Power Company.—Per cent of total, 18.50; per cent completed, 77; man days, 2849; per cent to be completed, 23; man days, 851; total man days, 3700.

Universal Electric and Gas Company.—Per cent of total, 7.75; per cent completed, 34; man days, 527; to be completed, percentage, 66; man days, 1023; total man days, 1550.

The totals of those are 157.7; 11,341; 43.3. Man days, 8659. Total man days, 20,000.

The figures shown above are composite figures, allowing for inventory and cost of the work for each company, together with allocation of administration and routine work on additions and betterments, and study of the entire amount to the separate companies.

Balance of the work to be done is being carried on in accordance with the Commission's instructions, both as to extent, detail and accuracy. This work involves the completion of the inventory and appraisal, together with the completion of depreciation study, inventories and reports. The per cent of the progress per month during the last two months has been approximately 7. On this basis the remaining work will require approximately six and one-half months to complete. The cost of the work in connection with these appraisals up to and including December 31, 1924, has been approximately \$69,600. The exact figures are not available, as the costs for December have not yet been reported. It is the present estimate that to complete the inventory and appraisal, including the determination of depreciation of these properties, it will cost, in addition, approximately \$60,000, or a total cost

of approximately \$130,000. The above estimates of man days and costs do not take into consideration the time and expense of accountants beyond the six and a half months' period to continue the study of additions and betterments which will be required up to the date of final transfer, nor any allowance for time or cost of special studies on intangibles or severance damages. Yours truly, Railroad Commission."

Letter dated January 2, addressed to the Board of Supervisors, in response to a motion made by Supervisor Harrelson at last Monday's session of the Board.

"We herewith transmit a report on the progress being made in two evaluation proceedings pending before the Railroad Commission"—that is the report I just read—"upon being advised of the action taken by the Board, we requested the engineering department of the Commission to send us a progress report, with estimate of the time it would take to complete the work; also a financial statement showing the amount already expended and the estimated future expenditures to complete the work. We enclose a copy of the report sent to us by the Railroad Commission. In addition to the work that is being done by the Commission we are having special studies made of the severance damage features of these companies. On this part of the work we have employed H. G. Butler, an engineer who was formerly power administrator for the Railroad Commission, and Mr. E. F. Scattergood, chief electrical engineer for the Bureau of Power and Light for the city of Los Angeles. Both are men well qualified for the work. Mr. Butler is familiar with both the Pacific Gas and Electric system and the Great Western Power Company system. He is familiar not only with local distribution systems of these companies, but also with their systems. Mr. Scattergood has been chief electrical engineer of the Bureau of Power and Light for a number of years. He was acting in that capacity at the time the city of Los Angeles took over the city distribution system of the Southern California Edison Company. He was the chief witness for the city of Los Angeles at the hearing before the Commission some years ago, when the Commission was making an evaluation of the city distribution system of that company for condemnation purposes. He has been in a position to observe the effect of severance resulting from the taking over of the city distri-

bution system from the Southern California Edison Company, and for that reason will be a very valuable witness for us in our cases. Mr. Ellis is making a study for depreciation as applied to the local distribution systems of the two companies. We expect to have these studies on depreciation and severance damage completed by the time the Commission completes the inventory and appraisal work upon which it is now engaged. We should be ready to proceed with the hearings before the Commission immediately thereafter, and can see no reason why the hearings should not be completed within a period of from four to six weeks. Respectfully submitted. George Lull, City Attorney. John J. Dailey, Special Counsel." With the report that I read before.

The Chairman: I suggest that these communications be printed in the Municipal Record.

Supervisor Harrelson: Mr. Mayor and members of the Board: When I introduced this motion I did so for the sole purpose of bringing before this Board the information that we should have. I do not believe the time should go on any longer when we should be fooled ourselves, or fool the public. It seems to me, that it is high time that we see what course we are going to pursue. Personally, I have never, at any time, favored the expenditure of all this money for an evaluation proceeding. Mr. Dailey, if he has anything to supplement this report, I would be glad to hear it at the present time. I would like to ask some further questions later on. If he cares to say anything at this time?

Mr. Dailey: Well, I do not know, Supervisor, just what you want in addition. If there is anything you would like to ask me in relation to the work that is going on, why I would be glad to answer that. This report from the Commission gives a little longer time for the completion of their work than I thought. I thought the work of the Commission would be completed by the first of June. And it was not until a few days before you called for this report that they advised us that they did not expect to have the work completed until shortly after the first of July. Now, the work, of course, is a gigantic one. It is a big undertaking, and in the first few months they were organizing their forces and they proceeded more slowly. They have a well-organized force, and it is working splendidly now, and they are in a

position to judge, from the work that is being accomplished each month, to judge, approximately how long it ought to take to complete it. We have monthly reports that are made showing progress on each one of about 50 different elements of this work, and that would show an engineer at a glance just what part of the work was completed, and what part was not completed and the progress of the incompleting portions. Now, you will gather from hearing that report read, that we cannot begin proceedings in the Commission, beyond going through preliminary stages like we have gone through threshing out certain law points until after at least about the middle of July. Now, we will have our other work ready by that time. That is going to consume a lot of time and energy too, and we have spent a lot on it already. To complete the study on the intangible elements which constitute a very big element in this case. We want to have that ready so that we can proceed immediately after the Commission files this report. Then it is a matter of presentation of the proof. That ought not to take more than from a month to six weeks to present that evidence, and the matter will then be submitted to the Commission. Now, how long it will take the Commission to decide the cases after the cases are heard I cannot say, of course. But, naturally, some little time will be consumed. Now, I do not know what you want to know further than that. There may be a time elapse after the power development is completed, to the stage when the power can be produced and even brought down as far as Newark before you will ever get this evaluation from the Commission, which may be along in the early fall before you can get it. If you have your power plant completed in two or three or four months, of course you will have power that will be available if you would have some way of disposing of it. Whether the Board should, in the consideration of that fact, take into consideration what can be done with this power in the meantime is a matter that I think you ought to consider, and is worthy of consideration at this time, because, if we have power that is available for even six months, or eight months or a year, some revenue could be gotten out of it. It is a matter that you should look into to see whether or not that could be done. Now, there may be various ways, and I do not

know whether you are asking me for any light on that subject or not. Mr. Harrelson did speak to me a little while ago about it, about the possibility of what might be done. I don't know. But the power might be sold to various companies, and in various places, temporarily, while we are working out a solution of the thing here. There was a great power shortage down in the San Joaquin Valley last year. If the various companies are in the same condition next year, and we had power that would be available—we could have disposed of all that last year. Whether we can dispose of our power, if we had it generated in time, before we can use it here, down there again, this coming summer, I don't know. But I believe it would be the part of wisdom for the Board to begin to inquire now, and see what might be done toward at least a temporary disposition of this power before we were in a position to utilize it ourselves. Now, after this evaluation is fixed by the Commission, there is a time of sixty or ninety days—I do not recall exactly which now—in which the companies could offer their properties to the City, if they wanted to, at a price fixed by the Commission. Now, that is the possibility that may come and it may not come. But either one of these companies could offer to take the price fixed by the Railroad Commission, and the City would then immediately have to arrange the details of financing it, and submitting the matter to the people and get their approval and take over the property. So no one can tell at this time how long it will be before we could be in a position, every thing being favorable, toward distributing our own power here in San Francisco. If we had an offer from one of the companies, or both of them, to sell their systems, and the people would ratify and approve the purchase of the property, it would not be very long before we could be disposing of our own power through our own facilities. If neither one of them should make an offer and both should refuse to sell at this time, and then we would get into court, it would not take many months to complete the work in the courts here, but it is a possibility that an appeal would be taken somewhere else. Now, those are contingencies that are ahead of us, and no one can tell what the outcome is going to be but we are trying to press the matter through the Commission just as rapidly as

human endeavor and ability can press those proceedings to a conclusion. And we are doing the best we can on our part, and it is up to the Board to consider in the meantime, the best policy for the city to pursue, or the information that it is necessary to get or advisable to get, to know how to handle this situation intelligently.

Supervisor Rossi: I would like to ask Mr. Dailey a question, through the chair: How long do you think, Mr. Dailey, it would be before the proposition would be submitted to the people to vote on a bond issue for distribution of the power, provided the companies would be unwilling to sell?

Mr. Dailey: It could be submitted to the people, assuming the Commission would decide the matter by October of this year, it could be submitted to the people in several months thereafter.

Supervisor Rossi: About a year from now?

Mr. Dailey: Oh, no, yes—about a year, approximately a year.

Supervisor Welch: Could it be submitted at the fall election in November?

Mr. Dailey: If the evaluation did not come down before October you could not, because you would not have time to call your bond election.

Supervisor Rossi: Assuming that the bond election would carry, could the companies still take it to the court, as to whether the city has a right to take them over or not?

Mr. Dailey: If they would refuse to sell, yes.

Supervisor Rossi: That would mean another delay then?

Mr. Dailey: It means the time that we would have to unwind ourselves in court, to get the properties over, like any other condemnation suit.

Supervisor Rossi: So it may be all the way from one year to two or three or four years before we will be able to distribute our own power?

Mr. Dailey: I don't know, I cannot tell you that.

Supervisor Rossi: I say, it is possible.

Mr. Dailey: If they should take the position of fighting us all the way down the line, and take an appeal from the Commission here and go to the Supreme Court of United States, it might be three or four

years before we would get a final decision. Now, that is looking at the thing from the worst of one situation. On the other hand, it is not improbable that if the Commission fixes a fair price, we might get some of those properties without going to court in condemnation.

Supervisor Rossi: Even in that case it would be a year before we could do much with our own power.

Supervisor Hayden: I think at the earliest.

Mr. Dailey: I assume, if we have to go through, it would be a year before we would have the distribution system.

Supervisor Hayden: How long did the gas case take that you followed up?

Mr. Dailey: They are not through yet.

Supervisor Hayden: How long back did you begin that?

Mr. Dailey: Well, we tried those cases in 1918 in the local courts here, and it went to the Supreme Court of the United States and back again, and it is back in the local courts again.

Supervisor Hayden: That is over six years now.

Supervisor Rossi: Mr. Chairman, do I understand that this report was referred to some special committee, or to the Public Utilities Committee for further discussion, or what was the ruling of the chair?

Supervisor Hayden: Put it on file, in the Municipal Record.

Supervisor Rossi: I think we should take notice of what Mr. Dailey has said, and that this Board here should take this matter up seriously, so far as to know just what disposition we will make of the power if need be, inasmuch as it will be at least one year before we will be able to distribute our own power. It may be good policy to have a bond issue to put in our own distributing system. I was of that opinion some several months ago, that we should possibly advocate a bond issue to put in our own distributing system, and then, in the event that the other companies saw fit to sell out, we would be in a position to take them over. Otherwise we will go along indefinitely. In the meantime we have today an offer, as I understand it from the report of the City Engineer, of \$2,000,000 a year for the power to be available within the next four months. I think it is a matter that should receive serious consideration, and that the proper committee

should go into it, not alone the Public Utilities Committee, but the Advisory Committee and the Finance Committee or any other member of the Board. I think the time has come when we should take that matter up and not wait any longer to know just what we are going to do with that power. If the city should distribute its own power, then we should advocate a bond issue, so that the city could put in its own distributing system. And even if that should carry it would mean several years before the distributing system could be put in. Not alone that, but it seems to me that we should look into the future. All big projects require the Board to look years ahead and to be prepared to take care of our public utilities. We have been working on the water proposition, for instance, for the past fourteen years, and it seems to me that we should give serious consideration at this time as to what we are going to do with the water when it is here, within five or six years, and not wait until that time and decide then as to whether we should put in our own distributing system or whether we should dump it into the bay. I am of the opinion that, if it be the policy of this Board to take over the Spring Valley Water Company at the appraised value, that we should submit that to the people at the earliest possible date. I do not think, in fact, I know, that the bonding limit will not permit it at this time, but that, possibly, could be presented to the people on the same basis that railroad properties were presented, that it be exempt from the bonding limit. And if the people of the City and County of San Francisco are ever to take over the Spring Valley Water Company it seems to me that the sooner they take it over the better, because it is on a paying basis, their rates are regulated by the Railroad Commission, and, as every member of this Board knows, we have today practically invested in the Spring Valley Water Company approximately \$6,000,000 in the bay division. And I think that the sooner we take over the Spring Valley Water Company, if it be the policy of this Board, the better. We should take that matter up at once, and see what we are to do in that direction. And that also applies to the taking over of the railway system. Some time ago a committee was appointed to bring in a report in reference to the taking over of the Market Street Railway Company. As we all know, the City and County of San Francisco is now in the railway business. We have

no money to make extensions with. At the same time we will not permit the Market Street Railway Company, or any other company, to make extensions. I think that committee should go into it very seriously and bring back a report at the very earliest moment, in order that the three big projects of the city should be well under way and not wait until the last minute and then find ourselves in the same situation as we are today with reference to the power situation. It should have been attended to three or four years ago. It is a serious question, and I think it is going to result in great loss to the city.

Supervisor Harrelson: Mr. Mayor, I want to confine myself exclusively to the ideas I had in mind when I presented this motion. The first was the time of completion and the next was the estimated cost to complete this appraisalment.

Supervisor Schmitz: Supervisor Harrelson, don't you think it would be advisable to have the City Engineer here?

Supervisor Harrelson: It is immaterial to me.

Supervisor Schmitz: I would like to ask that the City Engineer be sent for.

Supervisor Deasy: I suggest we go through the calendar while we are waiting for the Engineer.

Supervisor McSheehy: Mr. Uhl just asked me the privilege of asking Mr. Dailey just one question. Would the Board permit Mr. Uhl to ask Mr. Dailey one question?

The Chairman: Just one question?

Mr. Uhl: Just one question.

The Chairman: May I ask the subject that Mr. Uhl is going to discuss? I just read a communication addressed to myself from you, and if it is a copy of that—

Supervisor McSheehy: No, it is on the subject that we are talking about.

The Chairman: If that is the subject—

Mr. Uhl: Pertaining to evaluation. If you condemn these properties and we go into court, does the court ask for another evaluation, and do we lose that additional time for another evaluation? Can Mr. Dailey answer that?

Mr. Dailey: I did not catch your question.

Mr. Uhl: In case the Railroad Commission makes one evaluation, and we then begin condemnation proceedings against the companies, when that goes into court, does the

court make another evaluation of those properties?

Mr. Dailey: No, the evaluation fixed by the Railroad Commission is binding on the court, and that is submitted.

Supervisor Roncovieri: I would like to get out of this the approximate date. Did you say in October we will know what the appraisal is, is that understood?

Mr. Dailey: No, I do not know what time the Commission will take. The engineers say they will be ready with their report by the middle of July. We will be ready with our work by that time. Immediately thereafter the hearings can commence, and my estimate is that it should not take more than a month or six weeks to complete the matter for presentation to the Commission. How long it will take the Commission after that to decide it, of course, is a matter I cannot make any estimate on. Probably a month. It could be through by October if we completed it on this schedule.

Supervisor Roncovieri: That would be about the earliest date?

Mr. Dailey: I would not say that that would be the earliest possible date that we would get a decision from the Commission.

Supervisor Roncovieri: But that is about the earliest date that we will get a decision from the Commission?

Mr. Dailey: Yes.

Supervisor Roncovieri: It would be, of course, illegal for us to present to the people a proposition for a bond issue, without knowing the amount fixed by the Commission. But when that amount is known, then would it be legal to submit a bond issue to the people for that amount?

Mr. Dailey: That is the next step to take.

Supervisor Roncovieri: And will it be necessary to do that and have the money in hand; that is, the approval of the people before you go to court? May that not be an answer by the power companies, that, not having the money, not being ready to purchase, the court should throw the matter out and not consider it until the people are ready? Now, should not the people express themselves, through a bond issue, as early as possible, after knowing the exact valuation, and then go into court with the full knowledge that the people are ready to pay the bill, whether it is thirty or forty million dollars, or whatever

it may be, and then would not that strengthen your case in court?

Mr. Dailey: Well, under the procedure we are following, the next step is the submission of the matter to the people to vote upon before we go into court. We go into court after the people have voted in favor of it, and if they vote against it we do not go into court at all.

Supervisor Harrclson: Are we going to proceed with the calendar?

The Chairman: Yes.

* * * * *

Supervisor Harrclson: I think we should finish this matter while we have it before us. Now, I agree with Mr. Dailey so far as the time is concerned, if he will confine himself entirely to the inventory that is being made, and to the price fixing so far as the engineers or experts on behalf of the Railroad Commission are concerned. I think he is very sincere in what he says, and I believe the estimate of the Railroad Commission about six and a half months from date to do that much work. Now, that will mean along, say, about the first of August or possibly September, in their own estimate of time. After that is done these experts will have to go before the Railroad Commission and submit their prices. And, by the way, the first official knowledge I had of any other experts being employed was today, when I heard from the communication that Mr. Scattergood and Mr. Butler were employed. I heard nothing about the authority to incur that additional expense. After those prices are submitted to the Railroad Commission, then the evidence from the opposing side will be heard. That will be, in this case, the public utilities, the Pacific Gas and Electric Company and the Great Western Power Company. Now, at the time the Southern California Edison Company was condemned in the city of Los Angeles, that took a period of six months to hear that evidence before the Railroad Commission. After that was done the arguments and the briefs were filed by the counsel on either side. That took six months. I have figured that it may possibly take us four. That, together with the first two that I mentioned, is six additional months to the six and a half already estimated. After that is done the Commission has yet to render its decision. That in the case of Los Angeles took six months. I allow three. Now, according to my figures, there are nine additional months after the six and a half already mentioned, which is fifteen

and a half months, before the Railroad Commission has rendered its decision. At that time, if the utilities so desire, they have the right to go before the court of competent jurisdiction and plead for redress, and it would take a certain length of time additional before decision would be given in that event. Now, that is simply the evaluation proceedings, and the time required under the proceedings as they have been initiated before the Railroad Commission. Now, as to the cost, we are told today that about \$70,000 has been already spent as of December 31st. I think that is correct. It may have been December 1, but I believe it was December 31st. And an additional \$60,000 would be required to get this inventory and the fixing of prices before that Commission. That is \$130,000. Now, I do not understand that any part of the expense of the legal experts and engineering experts and others that possibly may be engaged is included in that estimate. Nor do I understand the possibility, in the event that the city does not take over these utilities by these proceedings, that we might be forced to pay the expense that the utilities have been put to, which, no doubt, will be almost as much as the City of San Francisco, thereby doubling what we now face the possibility of paying. I have not been informed, either, just what parts of the system outside of San Francisco are included. This estimate of cost and time was only on the parts of the systems within our city limits. Now, to establish the severance charges makes it necessary, of course, to take in other parts of the system, such as the substation at Newark, the one at Vacaville, and probably some of the steam plants, and the transmission line and the cable across the bay. But it does seem to me that Mr. Dailey has fixed the time of completion too early a date. I do not believe it is possible to do it within the early fall. I think it will be a year later than this coming fall. I believe the cost to the city at the best we can expect will be approximately \$200,000. Now, I believe that this matter should be taken up and referred to some committee, if necessary, or discussed further here in the Board, so that we can arrive at some conclusion in the near future before we proceed any further and allow any additional expense on this evaluation proceeding.

Supervisor Schmitz: I would like to ask the Chief some questions. Can you state positively now just when you will have the power at Newark?

Chief O'Shaughnessy: The pole line will be finished by the first of April. And I believe the mountain end will be finished by the same time.

Supervisor Schmitz: And by the first of April do I understand then you will be ready to deliver power at Newark?

Chief O'Shaughnessy: Yes.

Supervisor Schmitz: This is January, February, March, that is a little less than three months.

Chief O'Shaughnessy: That is correct.

Supervisor Schmitz: You are positive of that, are you, Chief O'Shaughnessy?

Chief O'Shaughnessy: Yes.

Supervisor Schmitz: That is, with the way the work is going on at the present time you will complete that work by the first of April, ready to deliver power at Newark?

Chief O'Shaughnessy: That is the program.

Supervisor Schmitz: Mr. Chairman, I would like to find out who employed Mr. Scattergood, who employed Mr. Butler, under what authority they are employed, and what their salaries are, and who established those salaries?

Mr. Dailey: I will tell you how they were employed and why they were employed, and all the financial arrangements about it. In the first place, it has been the practice of this city government in so far as litigation is concerned affecting matters of this kind, and in all litigation we have had with the Spring Valley Water Company, and all the litigation we have had with the Pacific Gas and Electric Company in Federal courts and in the Railroad Commission for that matter, to be handled through the City Attorney's office. And when it was necessary for us to get experts we were told and given the carte blanche authority to go out and get them because the responsibility for conducting that litigation is in that office, and is not in any other department around this city government.

Supervisor Schmitz: Who do you mean by "we were told?"

Mr. Dailey: We always had that authority and exercised it, and the bills were paid by the Board of Supervisors and never questioned in any respect.

Supervisor Schmitz: Who do you mean by "we?" I would like to get this for the record.

Mr. Dailey: The City Attorney's

office. Now, in this particular instance we did not proceed that way entirely. We knew it was necessary to get experts to fight experts, and we know that the companies will present the evidence of the best electrical engineers that they can get to fight us, particularly on two or three big issues in this case. One of them is the amount of the severance damage which may vary from half a million dollars to three or four or five million dollars. The company will undoubtedly claim eight or ten million dollars in severance damages, and we will have to fight that down. Another big element which will range in the millions of dollars—

Supervisor Schmitz: I do not want to interrupt you—

Mr. Dailey (interrupting): No, I want to get this position before you.

Supervisor Schmitz: But this is my question, I want a response to my question.

Mr. Dailey: I am going to give you the answer.

Supervisor Schmitz: All right, I would like to know, I have not got it yet who employed Mr. Scattergood and Mr. Butler.

Mr. Dailey: You will get it if you will let me tell the situation in my own way. Now, in order, as I say, to meet the other element of a "going concern", value and depreciation, those are the big and intangible uncertain elements in these cases that cannot be met without experts, capable experts against the very best experts that money can employ in this country.

Supervisor Schmitz: I am not questioning that. What I am trying to find out is, if you did need these experts, who hired them, and under what authority they were hired, and I also want to find out how much they are being paid. I am not questioning the reason for hiring them. Mr. Chairman.

Mr. Dailey: You might just as well understand the whole situation as to take it piecemeal.

The Chairman: Let me give what little information I know about here. I do not know what they are being paid, but I do know that Mr. Dailey called on the Mayor's office about a month ago and said that it would be necessary to get additional information, and asked me if the proper authority rested in the procedure that had been followed by the Board of Supervisors, and he mentioned the names of these two men, I believe.

Mr. Dailey: Yes.

The Chairman: It seemed that he acted on the authority of the resolution of this Board of Supervisors.

Supervisor Schmitz: Mr. Dailey is not representing the City Attorney's office.

The Chairman: I do not know how much they are being paid, and I do not know what they are doing, but I do know that Mr. Dailey spoke to me about it about a month ago and I gave my O K on it as far as I was concerned.

Mr. Dailey: Now, I will get down to the actual employment: I did speak to Mr. McLeran as Acting Mayor and also as chairman of the Finance Committee. I told him that it was necessary to get these experts, or men of this caliber. I told him who the men were. One was Mr. Butler, who was power administrator for the Railroad Commission, and told him what kind of arrangement we would make, that it was possible to make. Mr. Butler has just entered upon his employment. The first bill of some nine days work is on my desk now, and I intend to have it presented to the Finance Committee on next Friday. The arrangement with Mr. Butler is that he will be paid at the rate of \$50 a day for the days that he actually works, expecting him not to work more than 15 days a month, or he anticipated a period of four months, and we are to pay him not less than \$250 for the first five days of the month. That would make a maximum of \$750 a month. He is a man who is employed on other work part of the month. He was receiving \$75 a day from the Railroad Commission as power administrator at the time he was employed by the City on this proposition. That is for the time he put in on it. And employed also by the City of Oakland and receiving the same amount of money. Mr. Scattergood would accept employment under one way only, and that is that he would be paid a full fee of \$5,000 for his services, covering all of his expenses in the case, and his testimony in the case to the time of its completion. I mentioned those matters to Mr. McLeran. He said that he wanted to discuss it with some of the members, I think, of the Finance Committee, and he would let me know later. Later he told me that it was all right, to go ahead. And I made the arrangements with Mr. Scatter-

good, that is, Mr. Lull and myself, I say, "I," because I am acting as special counsel, but these matters are all taken up with Mr. Lull, and met with his approval and O K, and we wrote Mr. Scattergood. I went to Los Angeles and interviewed him personally, and employed Mr. Butler, and they are both now at work on the matter.

Supervisor Schmitz: That is what I am trying to find out. I think this Board of Supervisors ought to know everything pertaining to this case. This is a big proposition. It is a big thing for San Francisco, I would like to find out—that is what I wanted to find out, just how these two experts came to be employed. I never knew anything about it, and Supervisor Harrelson says he never knew anything about it until he read it in this report here today. I am not questioning or saying anything as to their ability. I wanted to have it in this record as to how they were employed, what their salaries were, so that we could estimate just about what it was going to cost the City and County of San Francisco for this appraisal. Now, you are going to have this power ready to distribute, practically ready to sell, on the first of April. As to Mr. Dailey's statement that, within sixty or ninety days after July, that it is probable that the companies will accept the appraisal of the Railroad Commission, I don't believe it. I think it is highly improbable that they will accept it because it practically means cutting off part of the body of that company, which is very important to the company. And I think that you will have to go further than that, and buy a larger part of their plant, or as has been suggested here, establish our own distributing system, which will mean that we will have to go to the people of San Francisco to ask not only for their approval, but also for them to provide the means. Now, I think that this ought to be done, Mr. Chairman. That the time of the City and County of San Francisco taking over the plant of either the Pacific Gas and Electric Company or the Great Western Power Company, is a long way off, much longer than one year. That the time of our having the power here is only three months off, when we are going to have at the very lowest figure \$2,000,000 worth of power net, to the City and County of San Francisco per year. Now, every month that you let that go down the stream you are going to

lose approximately \$180,000 a month. Now, sitting here as a board directors, don't you think that we ought to take that under consideration seriously, now, and not wait another day, not wait another hour, and now decide what we are going to do with that power. We are going to have it for one year at least, two years, maybe three years, and as has been stated, if it is going to be contested down through the courts of California, and then through the courts of the United States, it is going to be in the courts for four, five, or six years, before you are going to have an opportunity of using it. And now is the time for us to decide what we are going to do with it, and to make a contract with someone for the disposal of that power, so that San Francisco can get an income. I am not prepared, Mr. Chairman, or am I going to subscribe to any such a principle of letting the power run down the stream, costing \$180,000 to the City of San Francisco. We must get the revenue when it is here, and we must provide now, and take means now of having that revenue starting with the first of April. Now the Railroad Commission has stated here in their communication that it is going to cost practically \$130,000 for the appraisal, and, with these high paid engineers and experts at \$50 a day, we cannot figure until the time is expired and their work ceases. You can only approximate what that is going to cost, and it is running into hundreds of thousands of dollars that the city is going to be called upon to expend, and now is the time, if we have to expend that, to get the appraisal in order to put a bond issue up to the people, now is the time that we should endeavor to save as much money as it is possible to save, and the best way to save it is to provide and find some method of disposing of the power when it arrives at Newark on the first of April.

Supervisor Rossi: Mr. Mayor, and members of the Board, I, too, want to make the statement that, either as a member of the Board or as a member of the Finance Committee, I did not know anything about the employment of these experts. However, I am not taking any exception to that. The Board voted, and I believe unanimously, to make this evaluation, and there is nothing for us to do but to see that through. However, I would like to ask this question: Are these

experts included in that expense of \$130,000?

Mr. Dailey: No, they are not, that is the expense of the Railroad Commission. Now, Mr. McLeran asked me, as the chairman of the Finance Committee, what would be an outside figure to cover this, and I told him that \$10,000 would cover at least the experts for the city in this matter, that is, in addition, just the same as when we told you in the beginning that the Railroad Commission expenses were not the only expenses, because the statement was made before the Board that we would have to hire experts independent of the Railroad Commission's experts, and that that would probably cost the city from twenty-five to thirty thousand dollars outside of the expenses of the Railroad Commission, and it will.

Supervisor Rossi: What other expense will there be outside of the expenses of the evaluation that you have mentioned?

Mr. Dailey: Well, there is the expense of the special counsel and Mr. Ellis' expense.

Supervisor Rossi: All the expense in connection with evaluation?

Mr. Dailey: Yes, those expenses that the city is bearing today, and has been for several months past, together with the employment of Mr. Scattergood and Mr. Butler.

Supervisor Rossi: What do you figure that the total expense will be in connection with the evaluation from all directions and sources?

Mr. Dailey: You mean including the Railroad Commission's expenses and the city's expenses? The city's expenses will be in the neighborhood of \$30,000, from \$25,000 to \$30,000, in addition to the \$130,000 for the Commission.

Supervisor Rossi: About \$160,000, then, at the minimum?

Mr. Dailey: In the neighborhood of that, but we want to remember in considering this that this is the largest proceeding of the kind that ever was brought in this country.

Supervisor Rossi: I am not objecting to it. The only thing is that I well remember that the statement was made that the evaluation proceedings would cost about \$100,000.

Mr. Dailey: No, you are mistaken. The first estimate of the Railroad Commission was that their expense would be approximately \$100,000.

Supervisor Morgan: \$75,000.

Supervisor Rossi: Now the minimum is \$160,000.

Mr. Dailey: Do not get the thing

mixed. The estimate that you got from the Railroad Commission over here was that it would probably cost up to \$100,000, and you were told at that time, also, that there would be an additional twenty-five or thirty thousand dollars expense on the part of the city. Now the Railroad Commission's expense is a little higher than their original estimate.

Supervisor Rossi: The reason I am under that impression is this: That, in making up the budget, the Finance Committee only provided \$25,000 to take care of the evaluation proceedings.

Mr. Dailey: You did not set aside \$25,000 for the purpose of bearing that expense?

Supervisor Rossi: Not all of that.

Mr. Dailey: You contributed that much toward it.

Supervisor Rossi: I was under the impression that it would not exceed \$100,000, and the balance would be made up during the year.

Supervisor Harrelson: I would like to ask Mr. Dailey just one question, and that is this: In the event that the city fails to exercise its right to purchase these utilities after these evaluations have been completed, at the price fixed by the Railroad Commission, is it not a fact that those utilities can require the city to pay them their expenses incurred in imposing these proceedings, or in placing their values before the Railroad Commission?

Mr. Dailey: In certain contingencies, yes. If the Board would fail to submit the matter to the people to vote upon it, after getting the evaluation, the companies then could come back and apply to the Railroad Commission for an order estimating and determining the amount of expense that was legitimately incurred on the part of the companies, and it would be up to the city to pay for that. In certain other contingencies, no.

Supervisor Harrelson: I am not opposing the engaging of competent experts in any department in these proceedings. I happen to be well informed as to Mr. Scattergood, and also Mr. Butler, and they are very competent men, and I have also stated the same with reference to Mr. Dailey and Mr. Ellis. We will need all these experts, and many more well trained men, to appear on behalf of the city, for which we will have to pay a goodly sum, before this matter is completed. The only idea I had in mind was to bring to the attention of the members of the Board the exact conditions, so that we can face them, and nothing more.

Supervisor Roncovieri: Super-

visor Harrelson says that there will be need for even other experts, and I, like him, do not want to deny all the experts that may be needed in this matter. But it does occur to me we have experts, we have our chief, why do you go outside of the city Department and hire men at \$5,000 apiece when we have our own organization, led by one of the best chiefs in the country.

Supervisor Hayden: That is fine.

Mr. Dailey: There were a good many reasons for it, Mr. Roncovieri. One of the principal reasons is this, that Mr. Scattergood has gone through this very experience in Los Angeles. There was a big part of the Southern California Edison system severed from the Southern California Edison Company. And he was a witness for Los Angeles in that case. He made the study upon which the case was presented to the Commission to determine severance. He has seen the effects of it, and he has seen the effects upon the Southern California Edison Company. His experience in that line is going to be of very great value. Chief O'Shaughnessy knows Mr. Scattergood and his ability and I am sure will approve entirely of the wisdom of employing Mr. Scattergood in that respect. And he will be an extremely valuable man for us.

Supervisor Roncovieri: But it still seems to me that our own Chief Engineer and his well-equipped organization ought to be able to do that work. If it is a matter of the engineering department I will stand by our own Chief Engineer. I have nothing to say against Mr. Scattergood, I do not know the gentleman, but it does seem to me that it is not quite the right thing to employ people outside the city's own employees unless it is recommended by our Chief, unless he acknowledges—

Supervisor Morgan (interrupting): May I remind Supervisor Roncovieri there are only 24 hours in the day, and I think the Chief has his 24 hours pretty well taken up without taking over this extra burden. If they would only just remember that. The Chief only has 24 hours in the day, and I do not think he has very much loafing time.

Supervisor Roncovieri: We all have only 24 hours, and the hours are getting short for some of us.

Mr. Dailey: May I answer—

Supervisor Roncovieri (interrupting): That does not excuse employing people that you do not know.

Mr. Dailey: I discussed this mat-

ter with the Chief and he approved of the employment.

The Chairman: I just asked the Chief if it was necessary to hire these particular men and he said yes.

Supervisor Roncovieri: The Chief approves? Chief, do you approve of this?

Chief O'Shaughnessy: Yes, it was necessary.

* * * * *

The Chairman: Does that end the discussion?

Supervisor Colman: Mr. Mayor, I want to say that I was very much interested in all of the discussion, and I certainly am in hearty accord with some of the sentiments expressed by Supervisor Schmitz. In fact, it was with the desire to get that power here as soon as possible, to make it available as soon as possible, that I opposed the stopping of the work even for the short period of time, because I realized that there was an income of \$2,000,000, which should be available to the people at as early a date as it becomes available, and we should not block it from getting here. Now, it does appear to me, just offhand—and I do not criticize it—but there has been a greater degree of leniency in the time and the amount of expenses incurred by those negotiating the evaluation proceedings than was allowed to the Chief Engineer in the matters that have come up before him. The same care, apparently, was not taken to inform the Board, and the same strictness was not used in conducting the one negotiation as has apparently been shown in our actions toward the Chief Engineer. But, however, the point is that now it is only, from the statement of the Chief, a matter of three months when there will become available \$2,000,000 for the taxpayers of San Francisco, and there has been nothing done, up to this time, toward taking care of that money, and I think it is high time that something should be done, and I would move, if in order, that this matter be referred to the Public Utilities Committee and the Finance Committee, and they be instructed to bring in recommendations to the Board as to the disposal of the power when it becomes available on the first day of April. I make that in form of a motion.

Supervisor Schmitz: I second that.

The Chairman: If there is no objection such will be the order. I want to briefly refresh the memories of the Board to the subject under discussion now, as against a few

months ago, when there was a decided difference of honest opinion between the members of this Board and also between some of the press of San Francisco, when a suggestion was made that we postpone for the time being, at least, the consideration of completing Hetch Hetchy. And during that time it was distinctly understood by every member of the Board that when an agreement was reached that we would have the bond issue written in such a way that it could be used for a specific purpose, and that we would not consider calling another bond election during the year of 1925, not with a written understanding, but with a verbal understanding of those who were making the investigations before the Board. Commission, we would have a report in along about the first of the year. That report was estimated at that time, as the records will show, from a hundred to a hundred and fifty thousand dollars. Now, we either meant it at that time or we did not mean it. I believe every member of the Board meant what they said, when they were willing to provide the necessary money to pay the cost, and the necessary experts to bring in this report to this Board. I am not going to be surprised if that report is going to exceed \$150,000. It involved the evaluation of properties probably costing forty or fifty million dollars, both of them put together. I do not know, but \$150,000 or more, is not a large amount of money to spend to get the proper information. Mr. Dailey spoke to me about a month ago, maybe three weeks ago, about the necessity of getting men who were trained in being expert witnesses before official bodies to present San Francisco's side of the case. And he spoke of Mr. Butler, who was the power administrator for the United States Government during the war, and some gentleman in the south who had been sent to Washington to appear before the proper committees in Washington, to present expert testimony. And he said it would be necessary, in order to protect San Francisco's interest, and to build up our case, to have such evidence as coming from those gentlemen written into the record. I immediately, without any hesitancy, gave my consent, as far as any consent from me was necessary. He spoke to me in the Mayor's office about it. And I am not in favor of curtailing the proper investigation for bringing in that report. I would like to see the report brought in earlier than indicated in the in-

formation we have received here today. I am somewhat disappointed in the delay in getting this report. But, however, it should be speeded up, and if more money is necessary to speed it up, we will provide the money. It is information that we are going to have sooner or later and the quicker we get it the better. You will remember also, at that time, when the question of disposing of the power was discussed, it was freely stated, and has been stated time and time again since, that we have no right to sell that power without the amendment of the Garfield grant by an act of Congress, and there are a great many things to be taken into consideration before we can discuss the right of the city to sell power. We went into this with our eyes open. Some people in San Francisco do not approve of the policy of the city going into the power business. Others do agree. And it is a question for the people of San Francisco to settle, and before it can be settled, we must have that report from the Railroad Commission. And if it is going to be postponed for four or five months, Mr. Dailey, if a few thousand dollars more advanced will hurry up that report, why we want that report at the earliest date possible, and, if it is necessary to hire other experts, than what you have already employed, I think it should be presented to this Board and let this Board decide it. But we know that we are going to spend this money. We have spent about \$12,000 a month up to date, passed by this Board of Supervisors. We were told it was going to cost about \$10,000 a month. We spent \$60,000. He says \$60,000 more. Let us make three times sixty, \$180,000, for the report and I think we will come pretty near it.

Supervisor Schmitz: When I asked those questions it was not with any criticism in mind as to the advisability. It was, however, a criticism to this effect: That this Board should be notified, if it deserves notification, of what is going on as to the power situation, and as to the appraisal costs. If this Board is not going to be called upon to provide that money, then we have no right to know what it is for. But we will be called upon to provide money for these new experts.

The Chairman: I think we should get a report every week.

Supervisor Schmitz: Yes. So, therefore, if there are going to be any more experts employed, and I am not prepared to state that it may not be necessary—we should

be notified to that effect, so that we, sitting here on the Board as a board directors, can be informed.

The Chairman: Perfectly right.

Supervisor Schmitz: I just for a moment want to touch on the question of selling the power. If you have not the right to sell power, then you have already forfeited your rights in Hetch Hetchy because you have sold over \$300,000 worth of power, and you have sold it to the corporation.

Supervisor Roncovieri: Under an order of the government.

Supervisor Schmitz: Not under an order of the government.

Supervisor Roncovieri: Yes, it was.

Supervisor Schmitz: Was that sold under an order of the government?

Chief O'Shaughnessy: Under an order of the War Board.

Supervisor Schmitz: Under an order of the War Board, but that had nothing at all to do with the Raker Act.

Supervisor Roncovieri: The order has never been rescinded.

Supervisor Schmitz: And there is another question—

Supervisor Roncovieri (interrupting): An order of the government, a department.

Supervisor Schmitz: The Raker Act, as interpreted by Solicitor Edwards, would give the City and County the right to act, to have someone act as an agent for the distributing of that power. And still further, if it were necessary to distribute that power, we could go before Congress and ask to have that portion of the Raker Act amended. Now, if we are going to wait, Mr. Chairman, until April 1st to find out what we are going to do, if you are prevented now from disposing of that power, we want to know it. Why not know it now? Why wait until April 1st, when we are going to have it at our door? I think all those questions are in the hands of a good committee, and I think the committee ought to go into all those questions and bring the reports before this Board.

Supervisor Colman: I agree with your statements. I also voted for the evaluation, and I am not objecting to it as exceeding the original figure. That is bound to be, I realize that fully. It does so happen in practically every human endeavor. You cannot ever live within your budget. But I want to ask you a question: Supervisor Schmitz made the statement, and I said I agreed with it, that, after the Chief said the power would be available on the

first of April, Supervisor Schmitz and myself favored that the power be immediately disposed of, in the most advantageous legal way that we could then dispose of it for the benefit of the taxpayers. Is that your policy also? Is that a fair question? You did not meet that point of the discussion, Supervisor.

The Chairman: Personally I believe that we should hurry the report from the Railroad Commission and present the whole subject-matter to the people at the earliest date possible, after we get that report.

Supervisor Colman: You did not understand my question, Mr. Mayor. I do not think you heard me, Mr. Mayor. I will repeat it, because if you heard it you did not answer it, so I do not suppose you heard it, because you did not refuse to answer it. I said, that the Chief stated that the power would be available the first of April, and Supervisor Schmitz and myself favored the policy of disposing of that power as soon as it became available for the benefit of the taxpayers, that we were opposed to the policy of wasting any of the current that might be available, and could be used safely and legally. And as you did not discuss that angle of the question, I want to ask what your views are, if you oppose that?

The Chairman: My answer will be practically the same as it was, Supervisor. I believe that we can get the report in by the time the power is here, and that the election will be held immediately thereafter, before this question—

Supervisor Hayden (interrupting): The attorney does not say so, Mr. Chairman. Mr. Dailey does not say that.

Supervisor Colman: Then do you favor, Mr. Chairman, not disposing of the power until the evaluation report is in from the Railroad Commission?

The Chairman: Yes, my answer to that question is yes.

Supervisor Colman: What is your disposition of the power in the interim?

The Chairman: I do not know, Supervisor, whether there will be any interim or not.

Supervisor Colman: If there should be an interim.

The Chairman: I do not know, based upon past experience, when we are going to get that power. I do not know when Hetch Hetchy is going to be completed. I do not know whether we are going to be called upon to provide more money or not, and I am not in favor at this time of committing myself definite-

ly to any policy until I actually know that we are going to get that power, get that Railroad Commission's report, and submit the whole proposition to the people. We went into that. I agreed to it with the members of this Board, yourself included, and I am not going back on that agreement.

Supervisor Colman: Mr. Chairman, I agreed with the evaluation at the same time you did, nor am I going back on the evaluation.

The Chairman: And we were told at that time that the report would be ready about the first of the year.

Supervisor Colman: The first of this year.

The Chairman: The first of this year. The first of this year is passed and now the Engineer tells us it is going to be three months more—

Supervisor Colman (interrupting): Six months more, Mr. Dailey says six months more, and Mr. Harrelson shows pretty conclusively to all of us here, a whole year more. And now, at the same time, the City Engineer, who is charged with the construction of the Hetch Hetchy project, informs us today that the power will be available the first day of April, and, apparently, taking the word of Mr. Dailey at its face value, and taking the word of the Chief Engineer, both of them equally, there will be an interim, at which there will be power available at Newark, and the power, we are told, means \$2,000,000, or \$180,000 monthly, to the taxpayers of San Francisco. Now, it was to take care of this interim that I made a motion to refer it to a joint committee of the Finance Committee and Public Utilities Committee. Now, I want to say, Mr. Chairman, that if you have expressed a view today that you would not be in favor of any disposal of power during any interim that might come before the report before it was time to get an expression—

The Chairman (interrupting): What do you call an interim, a month, or two months, or six months?

Supervisor Colman: I do not say what it will be, but I think it will be one year, from what we have heard today, at least.

The Chairman: I don't know.

Supervisor Morgan: May I interrupt just to ask a question: Is this a matter before us that we shall find out how a certain member of the Board is going to vote, or what they are going to do? Is each person going to be questioned how they feel or how they are going to vote before we know whether it is going

to be April or December? I do not get just what Supervisor Colman is after.

Supervisor Colman: The Supervisor expressed his views on all points of the question save one, and as to me, that was the most important point of the whole question. I naturally always value his views and so have taken the liberty to ask him if he would desire to express his views on that particular question. There is nothing before the Board, we are having an informal discussion. Supervisor McLeran touched on every other point but the one on which I was most anxious to hear him.

The Chairman: It has been my hope all along that we would have this report in by the first of the year, and that we would have the opportunity of calling an election, without creating any interim. That has been the thought in my mind all along. I am not sure that that cannot be brought about as yet. Now, I may be wrong.

Supervisor Rossi: Mr. Mayor, we are both for the evaluation, and I am of the same frame of mind today. I want that evaluation to go on. I did not question that for a moment. The only thing was, it was news to me to learn today that other experts were employed. I think, as a member of the Board, and particularly as a member of the Finance Committee, that I should know matters of that kind. However, I am not objecting to it, and I am heartily in favor of speeding the work along as speedily as possible. I, too, was under the impression that the evaluation proceedings would be completed by the first of the year. I was firmly of that opinion, but from what has been brought out today I am satisfied that it will be at least a year before this matter will be submitted to the people on the question of taking over the properties of the Pacific Gas and Electric Company or the Great Western Power Company. And if there is going to be an interim of from nine months to a year, all I have got to say is this: That it is high time that some committees of this Board should look into the matter seriously and come back with a report.

The Chairman: May I ask you a question: the same question that Supervisor Colman asked me, practically: Are you in favor of disposing of the power if there is an interval between the time of the Railroad Commission's report and the time the power comes here?

Supervisor Rossi: Supervisor Mc-

Leran, when you answer the question I will answer yours.

Supervisor McSheehy: I am not going to touch entirely on this, but I am going to touch on the financial end of it to some degree. Today most all of the members attended the luncheon given to a former member of this Board, a retiring member of the Board of Education, former Supervisor Harris, and at that luncheon the Auditor asked me the direct question if we had made any direct appropriation for some \$129,000 worth of bills that he had in his office for Hetch Hetchy. Now, I think this is a pertinent question, and something ought to be done in that line, Mr. Chairman. I hope you won't let that go unheard. The Auditor—and I say that to you as a member of the Finance Committee—the Auditor has approximately \$129,000 worth of bills in his office. I think this Board should make some provision for taking care of those bills. They are Hetch Hetchy bills. I, as one member of this Board, would like to see the Board do something, so that our obligations will be met.

Mr. Chairman: We will take that up during the week and bring in a report next week.

* * * * *

Supervisor Rossi: Mr. Chairman, if there is no objection, I would like to have a transcript of the discussion in reference to the power project today.

The Chairman: If there is no objection, so ordered.

Supervisor Welch: I would like to have a copy.

Supervisor Hayden: Each member.

He thanked the members of the Board and the citizens for their comforting messages and thoughtful prayers, which cheered them up and helped them over the trying days during the serious illness of his son in Boston.

He told of the extraordinary courtesy and assistance extended to them by Mayor Curley and his wife of Boston, as well as others. How the people of Boston met in the churches to pray for the recovery of the young man.

He also stated that while the patient is very weak and still very ill, the danger is past.

He stated that while in the East he had made a study of traffic conditions and would in the near future have some new ideas to present to the Board.

He thanked Supervisor McLeran for the able manner in which he had conducted the City's affairs during his absence, and thought he must have been kept quite busy in looking after the Hetch Hetchy and reinstating Timothy Reardon as President of the Board of Works.

Privilege of the Floor.

Adolph Uhl, in connection with the foregoing, was granted the privilege of the floor on motion of Supervisor Harrelson. He suggested that if it be the purpose of the resolution to secure a better price by bringing power to San Francisco, that a bid should be solicited from the power companies. In that way we could find out before we make any expenditure how much we may expect to get for our power when brought to San Francisco. Mr. Uhl thought it very unbusinesslike to make an investment of \$800,000 without knowing in advance whether or not we would get a return to warrant it.

Action Deferred.

On motion of Supervisor Colman the following matters were *laid over four weeks* (February 9), to-wit:

Confirming the Sale of Land Owned by the City and County of San Francisco.

Bill No. 6952, Ordinance No. — (New Series), as follows:

Whereas, by Ordinance No. 6389 (New Series), approved October 30, 1924, the Board of Supervisors determined that public interest and necessity demanded the sale of the land hereinafter described and directed the Mayor of the City and County to sell all of said land at private sale, to be held on the 24th day of November, 1924, and directed that notice of said sale be given for two weeks successively next before the sale, as required by law; and

Whereas, the Clerk of the Board of Supervisors thereafter proceeded to publish notice of said sale in the official newspaper and one other daily newspaper published in the City and County for two weeks successively next before said sale was directed to be made, describing the land to be sold therein with common certainty and stating the date on which said sale would be made, as specified in Ordinance No. 6389 (New Series), and that all bids or offers would be received by the Mayor at his office in the City Hall, City and County of San Francisco, State of California, on said date; and

Whereas, the Mayor, the Assessor and the chairman of the Finance Committee, being the board of appraisalment constituted by the Charter of the City and County of San Francisco for such purpose, thereafter duly met and made an appraisalment of said land and fixed the fair value thereof at the sum of \$240, and reported said appraisalment to the Board of Supervisors in writing; and

Whereas, thereafter, and on the 24th day of November, 1924, the Mayor sold said property at private sale to Anna A. Anderson for the sum of \$240, and thereupon, and on the 15th day of December, 1924, duly notified the Board of Supervisors in writing of the fact of such sale, stating the sum bid, the name

of the bidder, and requesting that the Board confirm the sale; and

Whereas, the Clerk of the Board of Supervisors immediately thereupon proceeded to give notice by publication in the official newspaper and one other newspaper published in the City and County of San Francisco, for a period of twenty days from and after the 17th day of December, 1924, that at a meeting of the Board of Supervisors to be held on the 12th day of January, 1925, the matter of said sale would come up for confirmation, stating also in said notice the fact of the sale, the amount for which the property had been sold as aforesaid, and the name of the purchaser, and also stating that if at such meeting on the 12th day of January, 1925, an offer of 10 per cent more in amount than that named in said notice should be made to the Supervisors in writing by a responsible person, the Supervisors would confirm such sale to such person, or order a new sale; and

Whereas, the date of confirmation specified in said notice has now arrived and a higher bid has not been obtained than that named in said notice of confirmation of sale of the city land hereinafter described; and it appearing to the Board of Supervisors that the sum of two hundred forty and 00/100 dollars (\$240.00), bid as aforesaid by Anna A. Anderson, is not disproportionate to the value of the property sold, and that a greater sum cannot be obtained; therefore,

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The said sale of the said land hereinafter described to Anna A. Anderson for the sum of two hundred and forty dollars (\$240) is hereby ratified, approved and confirmed, and the Mayor and the Clerk of the Board of Supervisors are hereby authorized to execute and deliver to said purchaser, upon payment of the purchase price, a good and sufficient conveyance in the name of the City and County of San Francisco, conveying to Anna A. Anderson all the right, title and interest of the City and County of San Francisco in and to the land sold as aforesaid, and more particularly described as follows, to-wit:

Beginning at a point on the southerly line of Twentieth street, distant thereon 54 feet easterly from the easterly line of Church street, and running thence easterly along the southerly line of Twentieth street a distance of 1 foot; thence at right angles southerly 78.675 feet to the northeasterly boundary line of

Church street Municipal Railroad right of way; thence northwesterly along said northeasterly boundary line on a curve to the right of 106-foot radius, tangent to a line deflected 138 degrees 11 minutes to the right from the preceding course, central angle 49 minutes 2 seconds, a distance of 1.512 feet; thence northerly parallel with Church street 77.541 feet to the point of beginning. Being portion of Mission Block No. 88.

Section 2. The City Attorney is hereby directed to prepare the necessary conveyance and supervise the delivery of deed upon payment of purchase price as aforesaid.

No—Supervisor Rossi—1.

Explanation of Vote.

Supervisor Rossi: I want to be recorded as voting *no* on that for the reason that I do not think it is necessary to ask the Spring Valley Water Company to make the advance of \$250,000. There is still money in the Operative Fund. There is a balance in the Operative Fund of \$236,000. There is \$70,000 due from the Turlock Irrigation District, which, I understand, will be in within the next week or ten days, and there is also to be figured on \$130,000 for equipment that is of no further use on the Hetch Hetchy project, and there is also available in the interest fund, which will not be due and payable until June 30 of this year, \$361,367, which could be legally and properly transferred, making a total of \$800,000, and, in my opinion, that would be more than sufficient to carry on the work of completion, which is now in progress.

Telegram to Secretary of Treasury Regarding Taxation of Community Income Property.

Supervisor Morgan presented:

Resolution No. 23441 (New Series), as follows:

Whereas, last year Attorney-General Daugherty rendered an opinion to the Treasury Department recognizing the right of California taxpayers to the same division of community income and to the same division of community estates for the purposes of Federal income taxes and Federal estate taxes as are accorded to the other community property States such as California; and

Whereas, the Treasury Department accepted this decision which was in accord with the decisions of the Federal courts in the Blum case, and proceeded to make it effective; and

Whereas, last year shortly after Hon. Harlan F. Stone assumed office as the Attorney-General, the Treasury Department suspended its regulations making the Daugherty opinion effective and requested the new Attorney-General to review the case and render his opinion therein; and

Whereas, we are informed that Hon. Harlan F. Stone, as Attorney-General, rendered his opinion thereon to the Treasury Department last October and since that time the Treasury Department has failed to publish said opinion or to provide by appropriate regulations for the rights of California taxpayers, in accordance therewith; now, therefore, be it

Resolved, That the Board of Supervisors of the City and County of San Francisco send the following telegram to the Secretary of the Treasury:

"Hon. Andrew W. Mellon,
Secretary of the Treasury,
Washington, D. C.

"On behalf of California taxpayers we request that the opinion of the Attorney-General be promptly published which we understand has been given you concerning the taxation of community income and community estates in California, and that regulations be issued by your

Department governing the matter in conformity therewith at the earliest practicable moment. California taxpayers will be submitting their income statements in March and we think that they are entitled to know well in advance how those returns are to be made so that they may shape their financial plans accordingly. California executors and administrators desiring to pay proper Federal estate taxes are awaiting your action in the matter, as they must out of proper consideration for the interests intrusted to their charge. The whole community is much concerned over the long and unexplained delay in this matter. This telegram was accordingly authorized at our meeting of today. Board of Supervisors of the City and County of San Francisco."

And be it further Resolved, That copies of said telegram be wired to the President of the United States and to Attorney-General Stone, and that the Clerk of this Board of Supervisors be directed to dispatch said telegram as night letters accordingly.

Continuous San Francisco Baseball Season.

Supervisor McSheehy presented:
Resolution No. 23440 (New Series), as follows:

Whereas, the Pacific Coast Base-

ball League held continuous baseball games in San Francisco until three years ago when schedules were so arranged that two weeks they would be playing here in San Francisco and two weeks in Oakland.

Whereas, according to the daily average attendance of all cities represented in the Pacific Coast Baseball League, San Francisco has by far the best average daily attendance. Twenty years ago when the population and the daily attendance was one-half what it is today we had continuous baseball during the entire season.

Whereas, baseball is our national game and so recognized throughout the entire world and should be fostered and not discouraged by so arranging schedules that it is almost impossible to know just when baseball is being played at Recreation Park.

Resolved, That his Honor the Mayor be requested to appoint a committee of three members of this Board to confer with the Directors of the Pacific Coast Baseball League and see if ways and means cannot be devised so that the schedule for this coming year can be so arranged as to have continuous baseball here in San Francisco.

Adopted under suspension of the rules by the following vote:

A y e s — Supervisors Badaracco, Bath, Colman, Deasy, Harrelson, Hayden, Katz, McGregor, McLeran, McSheehy, Morgan, Robb, Roncovieri, Rossi, Schmitz, Shannon, Welch, Wetmore—18.

Withdrawal of Application for Oil Station, M. F. O'Brien.

The following was read and ordered *filed*:

Mr. Cornelius J. Deasy, Chairman, Fire Committee, Board of Supervisors, City Hall, San Francisco, Calif.

Dear Sir:

As I am to attend the funeral of Mrs. Elizabeth Schaefer, the mother of an employee long in my service, at 2 p. m. this afternoon, I will not be able to attend the meeting of the Board of Supervisors today.

However, I have been carefully considering your many requests to withdraw my application for a permit to erect a gasoline service station at the northeast corner of Geary and Collins streets. Although I had fully determined to fight this case to the end and am still undecided as to whether I shall dispose of the lot or use it to some other purpose, I have decided to follow your advice and hereby authorize you, in my absence, to formally withdraw my application at the meeting today.

Very truly yours,

M. F. O'BRIEN.

Civic Auditorium for Boxing.

Communication from Lurie Company, requesting to be advised whether or not the Civic Auditorium would be available before doing anything further with their proposition of building an arena on their property on Guerrero street between Fifteenth and Sixteenth streets.

Referred to Auditorium Committee.

San Francisco Bureau of Governmental Research on Newark-San Francisco Power Line.

Communication from San Francisco Bureau of Governmental Research, declaring that if it is the Board's intention to carry forward

construction of Newark-San Francisco Power Transmission Line at this time, it will commit San Francisco to an expenditure of \$800,000 for power distribution in advance of any vote of the people on the question, all of which will be wasted in case distributing systems now being evaluated are acquired by the City. Also, \$600,000 for new construction as well as \$217,000 previously set aside for opinion.

Read and ordered *filed*.

Relative to Purchase of Steel Towers for Newark-San Francisco Hetch Hetchy Transmission Line.

Communication from City Efficiency League, deploring fact that city has directed City Engineer to construct steel towers for Newark-San Francisco Hetch Hetchy transmission line, and contending that in case of acquisition of distributing systems of Pacific Gas and Electric and Great Western this additional line will be superfluous and an economic waste; and declaring that until question of acquisition of distributing system is determined by vote, nothing can be gained by this work, and if deferred, \$100,000 at least in interest might be saved.

Referred to Public Utilities and Finance Committee.

Supervisor Hayden's Work Commended.

Supervisor Margaret Mary Morgan commended the class of musical entertainments which are being given from time to time at the Civic Auditorium.

These concerts are given under the auspices of the Board of Supervisors, but the work of arranging for them and seeing that they are properly conducted falls upon the Auditorium Committee, a large portion of which is personally taken care of by the chairman of the committee, Supervisor Hayden.

Supervisor Morgan suggested that Supervisor Hayden be given a vote of thanks and that he should be especially commended for his valuable services rendered in connection with the holding of these symphony concerts.

Supervisors McLeran and McGregor also commended the work which has been done by the Auditorium Committee since Supervisor Hayden has been its chairman.

By his efforts the Auditorium is not only self-sustaining, but numerous improvements have been made out of its own funds, while in prior times the taxpayers sustained the expense of the Auditorium.

Supervisor Hayden, in response, told of the preparation which is now being made for another musical treat in the Second Annual Spring Music Festival.

In addition to the orchestra, under the supervision of Alfred Hertz, there will be a chorus of practically 600 voices and several artists from abroad to participate in the concerts.

Providing and Regulating Use of Railroad Tracks Belonging to the City and Formerly Owned by the Ocean Shore Railway.

The following bills were presented by Supervisor Harrelson:

Bill No. —, Ordinance No. — (New Series), as follows:

Providing for and regulating the use of certain railroad tracks owned by the City and County of San Francisco which were formerly owned by the Ocean Shore Railway Company and located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, by the owners or lessees of property adjacent as a connecting railway line between spur tracks connected therewith and the intersecting lines of a railroad entering the City and County of San Francisco.

Be it ordained by the People of the City and County of San Francisco as follows:

1. Whereas, the City and County of San Francisco is now the owner of certain railroad tracks formerly owned by the Ocean Shore Railway Company located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, connecting with the lines of the Southern Pacific Company, which tracks reverted to the City and County of San Francisco upon the abandonment of service by the Ocean Shore Railway Company and the forfeiture of its rights under the terms of franchises heretofore granted said company by the City and County; and

Whereas, the industrial development of the district through which said tracks extend between the southeasterly line of Harrison street and the northwesterly line of Howard street demands the establishment of spur tracks connecting the properties abutting on the streets in which the said railway tracks are laid with the said tracks of the City and County, thereby permitting freight cars to be transported within said limits either by means of steam locomotives or other motive power from the lines of any intersecting railway company whose lines enter the City and County of San Francisco over the said tracks belonging to the City and County, and thence over spur tracks connecting therewith to and into the properties abutting on said streets; and

Whereas, the City at this time does not desire to operate cars over said tracks for the purpose of maintaining or operating a railway for furnishing freight railway service, and it would not be advisable, profitable or beneficial for the City to tear up the said tracks now laid on the streets or on intervening lands between the southeasterly line of Harrison street and the northwesterly line of Howard street, or to sell or dispose of, or otherwise use, the materials in such tracks.

2. Therefore, it is hereby declared to be the policy of the City and County of San Francisco, during the will of the Board, to permit the owners or lessees of real property abutting on any of the streets upon which the said tracks now owned by the City and County between the southeasterly line of Harrison street and the northwesterly line of Howard street are laid, to use, subject to all the conditions herein expressed, or such as may be hereafter prescribed, the said tracks now owned by the City and County between said limits as a connecting railroad between the existing railroad line of the Southern Pacific Company which intersects such tracks, or the intersecting line of any other railroad company entering the City and County of San Francisco, and the individual spur tracks now connected with or which may hereafter, on permits duly granted by this Board, be connected with said spur tracks of the City and County; provided, however, that no spur track permit shall hereafter be granted to any applicant permitting the construction

and operation of a spur track connecting the premises of such applicant with the said tracks of the City and County, and permitting the operation of cars to and from such spur track over the said tracks of the City and County to and connecting with an intersecting line of an operating railroad entering the City and County; nor shall the owner or holder of any spur track permit heretofore granted for the construction of a spur track connection between any such adjoining property and the said tracks now owned by the City and County be permitted to continue to hold such permit for the construction and operation of a spur track except upon the condition that such owners or holders of spur track permits shall keep the said tracks of the City and County connecting such spur tracks with the lines of an operating railroad company which enters the City and County in good condition and repair, and also keep the pavement on the portion of the streets occupied by such tracks, and for two feet on either side thereof, in good condition and repair; and all of the provisions of Ordinance No. 69 (New Series) of the City and County of San Francisco, approved October 12, 1906, relative to the construction and repair of the tracks, street and pavement are hereby specifically made applicable to such City-owned tracks to the same extent as such provisions are applicable to the construction and maintenance of spur tracks.

3. Any spur track permit which has been or may be granted for connection with the said tracks owned by the City and County may be revoked at any time for failure or refusal of the owner or holder thereof to pay his proportionate share of the cost of maintaining and repairing such City and County tracks, and the portion of the streets occupied thereby and the pavement between such tracks and for two feet on either side thereof.

4. All the provisions of Ordinance No. 69 (New Series) of the City and County of San Francisco, approved October 12, 1906, relative to the operation of cars over spur tracks are hereby specifically made applicable to the operation of cars over the said tracks of the City and County within said limits, and the freight cars of any railroad which has track connections in the City and County of San Francisco with an operating railway shall, upon de-

mand of any person, firm or corporation for whose use or benefit any spur track connecting with such City and County tracks is operated, be transported over such City and County tracks and placed upon the individual spurs so demanding such service.

5. Nothing in this ordinance shall be construed as granting any franchise to any railroad company to operate its cars or locomotives over the said tracks of the City and County, or as granting to any railroad company a right not to be enjoyed by any other railroad company whose lines now or hereafter may enter the City and County and intersect or connect with the said tracks of the City and County.

6. Nothing in this ordinance shall be construed as preventing the City and County of San Francisco from hereafter revoking the right of any or all owners or holders of spur track permits connecting with the said tracks of the City and County to continue to use the said tracks of the City and County as a connecting line between said spur tracks and the lines of any operating railroad company.

7. This ordinance shall take effect immediately.

Provided, that said spur track shall be laid under the supervision and to the lines and grades as furnished by the City Engineer's office; and that any and all expenses connected with the installation of the track, restoration of the pavement and any additional requirements for the surface drainage be paid for by Southern Pacific Company.

Section 2. Provided no locomotive, car or cars shall be taken over this spur track from Harrison to Howard streets except between the hours of 1 o'clock p. m. and 4 o'clock p. m.

Depreciation Fund, Municipal Railway.

Resolution No. — (New Series), as follows:

Whereas, the accounts of our Municipal Railway are so complicated owing to a provision in Ordinance No. 3109, calling for the setting aside of 18 per cent of the gross revenues for depreciation and bond redemption that the average citizen has conceived the idea that the road is facing financial ruin.

Whereas, reports from the book-keeping department of the Board of Public Works of June 30, 1924, show a total income of \$25,842,219 with operating expenses of \$17,641,623 and a gross receipt profit of \$8,200,597. A funded debt of \$2,374,962 and an accident and damage debt of \$258,708, leaving a net profit for depreciation of \$5,466,927. This depreciation fund has been entirely depleted by bond redemption, loans to general fund, additions and betterments.

Whereas, as the present 18 per cent depreciation is a misnomer and

means nothing, as it does not protect the depreciation fund, but simply invites an expenditure for additions and betterments.

Resolved, That Bill No. 3409, Ordinance No. 3109, Volume 9, New Series to New Series, ordinance of the City and County of San Francisco, California, providing for a depreciation fund for said railway is hereby repealed.

Resolved, First, for the purpose of meeting all charges and expenses that may arise from accidents and damages resulting from the operation of the Municipal Street Railway a sum equal to two per cent of the gross passenger revenues of said railway be set aside.

Second, that there shall be set aside from the gross passenger earnings of said railway such sums as shall be necessary to meet the bonded indebtedness incurred in the construction of said railway as the same becomes due.

Third, for the purpose of meeting all necessary charges and expenses that may arise on account of replacements, reconstruction and depreciation of and to the Municipal Street Railway a sum equal to three per cent of the cost of such railway and its equipment.

Fourth, that the moneys set aside for replacement, reconstruction and depreciation shall be known as the Amortization Fund, and shall be invested by the City Treasurer in securities approved by the Charter, and that the principal thereof together with the interest earned thereon shall be used for no other purposes than those specified herein. Be it

Resolved, That this resolution be referred to the Finance and Public Utilities Committees for a report on same as soon as possible, and that copies be sent to all members of this Board, Auditor and Treasurer and Board of Public Works.

To the Honorable Board of Supervisors of the City and County of San Francisco:

We, the undersigned, electors of the City and County of San Francisco, State of California, hereby respectfully apply to your honorable Board and represent as follows:

That we are affiliated with a certain voluntary organization known as Bridging the Golden Gate Association, whose object is to form a bridge and highway district under Chapter 228 of the Statutes of 1923, and eventually to bridge the Golden Gate. That said association has canvassed the desires of the Boards of Supervisors of the counties mentioned in the proposed ordinance, and submitted herewith, and believes that a district can be formed out of counties mentioned in said ordinance. The said ordinance has been prepared with special reference to this application, and similar applications to the counties named therein, and that said ordinance should be passed by you in the identical form submitted, and without alteration, in order to effect a legal formation of this district and avoid complications which would probably arise if this form should be departed from, as a uniformity of purpose should be manifest by all of the counties uniting in passing the ordinance to form a bridge district having the extent specified in ordinance.

Wherefore, your applicants formally apply to your Honorable Board to pass the ordinance which is hereby submitted for that purpose within sixty days, as provided by the act hereinabove mentioned.

Report of Finance Committee on Purchase of Lighting Poles for Civic Center.

The Finance Committee, after making a thorough investigation of the transactions in connection with the installation of lights in the Civic Center, have made the following report:

"To the Honorable the Board of Supervisors:

Your Finance Committee has made a thorough investigation in the matter of the installation of lighting poles in the Civic Center, and reports thereon as follows:

When the payment of the bill was questioned, the Finance Committee, on call of its acting chairman, then acting Mayor, met on November 26 and on December 12, 1924, with the members of the Lighting Committee and other interested parties. After hearing statements, a special committee—John Reid, Jr., City Architect; Ralph W. Wiley, Chief of

the Department of Electricity; C. H. Healy, Assistant City Engineer, and Leonard S. Leavy, Purchasing Agent—was directed to thoroughly examine all of the records and file a written report. At this first meeting it was disclosed that the clerk of the Lighting Committee was authorized and directed by the Lighting Committee to instruct the Purchasing Agent to purchase those marbelite poles. The Purchasing Agent, in turn, communicated with the Marbelite representative, and, after negotiating prices, placed the order. The price quoted the Purchasing Agent was lower than the price originally quoted to the Lighting Committee.

On December 19 another meeting was held, and the investigators filed their report (copies of which were sent to members of the Board). This report stated that the charge for the poles was fair, but, in the opinion of the sub-committee, the charge for installation was high. This charge included \$35 per pole for overhead. In the opinion of these gentlemen a charge of \$25 would have been more equitable.

Notwithstanding this opinion, your Finance Committee believes that the Marbelite Company should receive payment of the bill, inasmuch as the work was performed in good faith.

There was no evidence presented to the committee to indicate that any member of the Lighting Committee or the Supplies Committee or the Purchasing Agent was in any way unduly influenced in the purchase of these poles. The installation was urged as an emergency by the Mayor's office to make the Civic Center presentable for celebrations of a national character which were to be held.

The usual method of having light poles placed and maintained in our public streets is to direct the Pacific Gas and Electric Company to install them. In the case of the Civic Center this procedure was not followed.

Therefore your committee recommends that the Pacific Gas and Electric Company be requested to adjust the claim of the Marbelite Company; provided, however, that no additional charge for lighting and maintaining these poles be made against the city lighting fund.

Respectfully submitted,

RALPH McLERAN,
ANGELO J. ROSSI,
JOHN MCGREGOR,
Finance Committee.

On motion of Supervisor McGregor the report of the Finance Committee was unanimously adopted.

ed and ordered printed in the Journal and the Clerk was instructed to request the Pacific Gas and Electric Company to liquidate the claim of the Marbelite Company, provided that this does not mean any additional charge for lighting and maintenance.

Supervisor Welch moved that the City Attorney be requested to render his opinion as to whether or not the Board of Public Works or the Board of Supervisors have the right under the Charter to order the installation of street lights.

So ordered.

Confirming the Sale of Land Owned by the City and County of San Francisco.

Bill No. 6952, Ordinance No. 6495 (New Series), as follows:

Confirming the sale of land owned by the City and County of San Francisco.

Whereas, by Ordinance No. 6389 (New Series), approved October 30, 1924, the Board of Supervisors determined that public interest and necessity demanded the sale of the land hereinafter described and directed the Mayor of the City and County to sell all of said land at private sale, to be held on the 24th day of November, 1924, and directed that notice of said sale be given for two weeks successively next before the sale, as required by law; and

Whereas, the Clerk of the Board of Supervisors thereafter proceeded to publish notice of said sale in the official newspaper and one other daily newspaper published in the City and County for two weeks successively next before said sale was directed to be made, describing the land to be sold therein with common certainty and stating the date on which said sale would be made, as specified in Ordinance No. 6389 (New Series), and that all bids or offers would be received by the Mayor at his office in the City Hall, City and County of San Francisco, State of California, on said date; and

Whereas, the Mayor, the Assessor and the chairman of the Finance Committee, being the board of appraisal constituted by the Charter of the City and County of San Francisco for such purpose, thereafter duly met and made an appraisal of said land and fixed the fair value thereof at the sum of \$240, and reported said appraisal to the Board of Supervisors in writing; and

Whereas, thereafter, and on the 24th day of November, 1924, the Mayor sold said property at private sale to Anna A. Anderson for the sum of \$240, and thereupon, and on the 15th day of December, 1924, duly notified the Board of Supervisors in writing of the fact of such sale, stating the sum bid, the name of the bidder, and requesting that the Board confirm the sale; and

Whereas, the Clerk of the Board of Supervisors immediately thereupon proceeded to give notice by publication in the official newspaper and one other newspaper published in the City and County of San Francisco, for a period of twenty days

from and after the 17th day of December, 1924, that at a meeting of the Board of Supervisors to be held on the 12th day of January, 1925, the matter of said sale would come up for confirmation, stating also in said notice the fact of the sale, the amount for which the property had been sold as aforesaid, and the name of the purchaser, and also stating that if at such meeting on the 12th day of January, 1925, an offer of 10 per cent more in amount than that named in said notice should be made to the Supervisors in writing by a responsible person, the Supervisors would confirm such sale to such person, or order a new sale; and

Whereas, the date of confirmation specified in said notice has now arrived and a higher bid has not been obtained than that named in said notice of confirmation of sale of the city land hereinafter described; and it appearing to the Board of Supervisors that the sum of two hundred forty and 00/100 dollars (\$240.00), bid as aforesaid by Anna A. Anderson, is not disproportionate to the value of the property sold, and that a greater sum cannot be obtained; therefore,

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The said sale of the said land hereinafter described to Anna A. Anderson for the sum of two hundred and forty dollars (\$240) is hereby ratified, approved and confirmed, and the Mayor and the Clerk of the Board of Supervisors are hereby authorized to execute and deliver to said purchaser, upon payment of the purchase price, a good and sufficient conveyance in the name of the City and County of San Francisco, conveying to Anna A. Report of Joint Committee Streets and Commercial Development.

Supervisor Harrelson presented:
San Francisco,
January 19, 1925.

To the Honorable the Board of Supervisors.

Your Joint Committee on Commercial Development and Streets to which was referred the application of the Southern Pacific Company for a revocable permit to operate steam locomotives on Twelfth street from Harrison street to Howard street, recommends the passage of two bills as printed in the Calendar.

Bill No. —, Ordinance No. — (New Series), entitled "Providing for and regulating the use of certain railroad tracks owned by the Ocean Shore Railway Company and located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street by the owners or lessees of property adjacent as a connecting railway line between spur tracks connected therewith and the intersecting lines of a railroad entering the City and County of San Francisco."

Bill No. —, Ordinance No. — (New Series), entitled "Granting permission, revocable at will of the Board of Supervisors, to the Southern Pacific Company to operate with steam locomotives and cars over the tracks belonging to the City and County of San Francisco, formerly the property of the Ocean Shore Railway Company, as hereinafter described."

The permits granted under these ordinances are revocable at will of the Board of Supervisors and provides for the transportation of freight only from the southeasterly line of Harrison street and Twelfth street to Howard street and Twelfth street.

The bill granting the Southern Pacific Company the right to use

the tracks of the City and County of San Francisco, formerly owned by the Ocean Shore Railroad Company, is the same form as Bill No. 6532, Ordinance No. 6089 (New Series), passed December 19, 1923, between Twelfth and Harrison streets and Florida and Mariposa streets.

In presenting the bill granting permission to operate locomotives and cars on Twelfth street from Harrison to Howard streets, your committee is of the opinion that the rights of the people of the City and County of San Francisco have been fully safeguarded by the following recommendations:

1. Provided, no locomotive, car or cars shall be taken over the spur track on Twelfth street from Harrison street to Howard street except between the hours of one o'clock p. m. and four o'clock p. m.

2. Provided, no locomotive, car or cars shall be allowed to stand on any street on or over which this spur track is operated at any time, day or night.

Respectfully submitted,

WM. H. HARRELSON.

Passed for Printing.

Whereupon, the roll was called and the following ordinance was passed for printing by the following vote:

Providing and Regulating Use of Railroad Tracks Belonging to the City and Formerly Owned by the Ocean Shore Railway.

Bill No. 6984, Ordinance No. — (New Series), as follows:

Providing for and regulating the

use of certain railroad tracks owned by the City and County of San Francisco which were formerly owned by the Ocean Shore Railway Company and located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, by the owners or lessees of property adjacent as a connecting railway line between spur tracks connected therewith and the intersecting lines of a railroad entering the City and County of San Francisco.

Be it ordained by the People of the City and County of San Francisco as follows:

1. Whereas, the City and County of San Francisco is now the owner of certain railroad tracks formerly owned by the Ocean Shore Railway Company located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, connecting with the lines of the Southern Pacific Company, which tracks reverted to the City and County of San Francisco upon the abandonment of service by the Ocean Shore Railway Company and the forfeiture of its rights under the terms of franchises heretofore granted said company by the City and County; and

Whereas, the industrial development of the district through which said tracks extend between the southeasterly line of Harrison street and the northwesterly line of Howard street demands the establishment of spur tracks connecting the properties abutting on the streets in which the said railway tracks are laid with the said tracks of the City and County, thereby permitting freight cars to be transported within said limits either by means of steam locomotives or other motive power from the lines of any intersecting railway company whose lines enter the City and County of San Francisco over the said tracks belonging to the City and County, and thence over spur tracks connecting therewith to and into the properties abutting on said streets; and

Whereas, the City at this time does not desire to operate cars over said tracks for the purpose of maintaining or operating a railway for furnishing freight railway service, and it would not be advisable, profitable or beneficial for the City to tear up the said tracks now laid on the streets or on intervening lands between the southeasterly

line of Harrison street and the northwesterly line of Howard street, or to sell or dispose of, or otherwise use, the materials in such tracks.

2. Therefore, it is hereby declared to be the policy of the City and County of San Francisco, during the will of the Board, to permit the owners or lessees of real property abutting on any of the streets upon which the said tracks now owned by the City and County between the southeasterly line of Harrison street and the northwesterly line of Howard street are laid, to use, subject to all the conditions herein expressed, or such as may be hereafter prescribed, the said tracks now owned by the City and County between said limits as a connecting railroad between the existing railroad line of the Southern Pacific Company which intersects such tracks, or the intersecting line of any other railroad company entering the City and County of San Francisco, and the individual spur tracks now connected with or which may hereafter, on permits duly granted by this Board, be connected with said spur tracks of the City and County; provided, however, that no spur track permit shall hereafter be granted to any applicant permitting the construction and operation of a spur track connecting the premises of such applicant with the said tracks of the City and County, and permitting the operation of cars to and from such spur track over the said tracks of the City and County to and connecting with an intersecting line of an operating railroad entering the City and County; nor shall the owner or holder of any spur track permit heretofore granted for the construction of a spur track connection between any such adjoining property and the said tracks now owned by the City and County be permitted to continue to hold such permit for the construction and operation of a spur track except upon the condition that such owners or holders of spur track permits shall keep the said tracks of the City and County connecting such spur tracks with the lines of an operating railroad company which enters the City and County in good condition and repair, and also keep the pavement on the portion of the streets occupied by such tracks, and for two feet on either side thereof, in good condition and repair; and all of the provisions of Ordinance No. 69 (New Series) of

the City and County of San Francisco, approved October 12, 1906, relative to the construction and repair of the tracks, street and pavement are hereby specifically made applicable to such City-owned tracks to the same extent as such provisions are applicable to the construction and maintenance of spur tracks.

3. Any spur track permit which has been or may be granted for connection with the said tracks owned by the City and County may be revoked at any time for failure or refusal of the owner of holder thereof to pay his proportionate share of the cost of maintaining and repairing such City and County tracks, and the portion of the streets occupied thereby and the pavement between such tracks and for two feet on either side thereof.

4. All the provisions of Ordinance No. 69 (New Series) of the City and County of San Francisco, approved October 12, 1906, relative to the operation of cars over spur tracks are hereby specifically made applicable to the operation of cars over the said tracks of the City and County within said limits, and the freight cars of any railroad which has track connections in the City and County of San Francisco with an operating railway shall, upon demand of any person, firm or corporation for whose use or benefit any spur track connecting with such City and County tracks is operated, be transported over such City and County tracks and placed upon the individual spurs so demanding such service.

5. Nothing in this ordinance shall be construed as granting any franchise to any railroad company to operate its cars or locomotives over the said tracks of the City and County, or as granting to any railroad company a right not to be enjoyed by any other railroad company whose lines now or hereafter may enter the City and County and intersect or connect with the said tracks of the City and County.

6. Nothing in this ordinance shall be construed as preventing the City and County of San Francisco from hereafter revoking the right of any or all owners or holders of spur track permits connecting with the said tracks of the City and County to continue to use the said tracks of the City and County as a connecting line between said spur tracks and the lines of any operating railroad company.

7. This ordinance shall take effect immediately.

Believing that a serious error has been made in refusing to further study and consider the problem in order to settle this matter to the satisfaction of all concerned, and particularly to all the people of San Francisco, I will vote against the granting of this franchise for a spur track."

Passed for Printing.

Use of Ocean Shore Railroad Tracks.

The following matter, passed for printing at last meeting, was taken up:

Bill No. 6984, Ordinance No. 6511 (New Series), as follows:

Providing for and regulating the use of certain railroad tracks owned by the City and County of San Francisco which were formerly owned by the Ocean Shore Railway Company and located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, by the owners or lessees of property adjacent as a connecting railway line between spur tracks connected therewith and the intersecting lines of a railroad entering the City and County of San Francisco.

Be it ordained by the People of the City and County of San Francisco as follows:

1. Whereas, the City and County of San Francisco is now the owner of certain railroad tracks formerly owned by the Ocean Shore Railway Company located in Twelfth street and lying between the southeasterly line of Harrison street and the northwesterly line of Howard street, connecting with the lines of the Southern Pacific Company, which tracks reverted to the City and County of San Francisco upon the abandonment of service by the Ocean Shore Railway Company and the forfeiture of its rights under the terms of franchises heretofore granted said company by the City and County; and

Whereas, the industrial development of the district through which said tracks extend between the southeasterly line of Harrison street and the northwesterly line of Howard street demands the establishment of spur tracks connecting the properties abutting on the streets in which the said railway tracks are laid with the said tracks of the City and County, thereby permitting freight cars to be transported within said limits either by means of steam locomotives or other motive power from the lines of any intersecting railway company whose lines enter the City and County of San Francisco over the said tracks belonging to the City and County, and thence over spur tracks connecting therewith to and into the properties abutting on said streets; and

Whereas, the City at this time does not desire to operate cars over said tracks for the purpose of maintaining or operating a railway for furnishing freight railway service, and it would not be advisable, profitable or beneficial for the City to tear up the said tracks now laid on the streets or on intervening lands between the southeasterly line of Harrison street and the northwesterly line of Howard street, or to sell or dispose of, or otherwise use, the materials in such tracks.

2. Therefore, it is hereby declared to be the policy of the City and County of San Francisco, during the will of the Board, to permit the owners or lessees of real property abutting on any of the streets upon which the said tracks now owned by the City and County between the southeasterly line of Harrison street and the northwest-

erly line of Howard street are laid, to use, subject to all the conditions herein expressed, or such as may be hereafter prescribed, the said tracks now owned by the City and County between said limits as a connecting railroad between the existing railroad line of the Southern Pacific Company which intersects such tracks, or the intersecting line of any other railroad company entering the City and County of San Francisco, and the individual spur tracks now connected with or which may hereafter, on permits duly granted by this Board, be connected with said spur tracks of the City and County; provided, however, that no spur track permit shall hereafter be granted to any applicant permitting the construction and operation of a spur track connecting the premises of such applicant with the said tracks of the City and County, and permitting the operation of cars to and from such spur track over the said tracks of the City and County to and connecting with an intersecting line of an operating railroad entering the City and County; nor shall the owner or holder of any spur track permit heretofore granted for the construction of a spur track connection between any such adjoining property and the said tracks now owned by the City and County be permitted to continue to hold such permit for the construction and operation of a spur track except upon the condition that such owners or holders of spur track permits shall keep the said tracks of the City and County connecting such spur tracks with the lines of an operating railroad company which enters the City and County in good condition and repair, and also keep the pavement on the portion of the streets occupied by such tracks, and for two feet on either side thereof, in good condition and repair; and all of the provisions of Ordinance No. 69 (New Series) of the City and County of San Francisco, approved October 12, 1906, relative to the construction and repair of the tracks, street and pavement are hereby specifically made applicable to such City-owned tracks to the same extent as such provisions are applicable to the construction and maintenance of spur tracks.

3. Any spur track permit which has been or may be granted for connection with the said tracks owned by the City and County may be revoked at any time for failure

or refusal of the owner of holder thereof to pay his proportionate share of the cost of maintaining and repairing such City and County tracks, and the portion of the streets occupied thereby and the pavement between such tracks and for two feet on either side thereof.

4. Opinion of City Attorney Relative to Powers of Supervisors and Board of Public Works in Installing Street Lights.

The following was presented, read, ordered spread in Journal and copies sent to members:
Gentlemen:

I am in receipt of your request for an opinion as follows:

"The Board of Supervisors, on motion of Supervisor Welch, desires your opinion on whether the Board of Public Works or the Board of Supervisors has jurisdiction in the matter of installing street lights in the City and County."

OPINION.

Subdivision 13, section 1, chapter II, article II of the Charter provides among the powers of the Supervisors as follows:

tions and restrictions in this Charter contained, the Board of Supervisors shall have power:

"Except as otherwise provided in this Charter, to regulate and control the location and quality of all appliances necessary to the furnishing of water, heat, light, power, telephonic and telegraphic service to the City and County, and to acquire, regulate and control any and all appliances for the sprinkling and cleaning of the streets of the City and County, and for flushing the sewers therein."

Section 6, chapter III, article II, provides as follows:

"No contract for lighting streets, public buildings, places or offices shall be made for a longer period than one year, nor shall any contract to pay for gas, electric light or any illuminating material at a higher rate than the minimum price charged to any other consumer, be valid."

Subdivision 1, section 9, chapter I, article VI, provides:

"The Board of Public Works shall have charge, superintendence and control, under such ordinances as may from time to time be adopted by the Supervisors; of * * * the erection of telegraph and telephone poles and poles for electric lighting * * *"

Subdivision 3 of the same section provides:

"Of the cleaning and sprinkling of all public streets, avenues, alleys, places, courts, roads, highways and boulevards, and the lighting of the same and the lighting of the parks, squares and other public places and public buildings."

Construing these provisions together, the matter of letting contracts annually for the furnishing of electric current and gas for street lighting is under the control of the Board of Supervisors. On the other hand, while the section first above quoted gives the Board of Supervisors control over the location and quality of appliances necessary for furnishing light to the City and County, it likewise gives to the Board of Public Works the general superintendence and control of the lighting of the public streets subject to such ordinances as may be adopted by the Board of Supervisors. The net effect of these various sections, in my opinion, is this: The Board of Supervisors may by ordinance determine the character and location of fixtures to be installed on the public streets for lighting the same and they likewise, of course, must appropriate the funds necessary for

"Subject to the provisions, limita-

that purpose; but having determined that street lights of a certain character should be installed at certain locations and having appropriated the funds necessary for that purpose, it then becomes the function of the Board of Public Works to let contracts for the installation of such lights or in the alternative to provide for their installation by day labor as provided in section 14, chapter I, article VI.

I therefore advise you that in the matter of the installation of new fixtures for street lighting, the Board of Supervisors should adopt such ordinances as it deems advisable, directing with as much detail as the Board considers necessary the character of lights to be installed and the location of such installation. It then becomes the duty of the Board of Public Works to install the lights pursuant to the directions embodied in such ordinance.

Very truly yours,
GEORGE LULL,
 City Attorney.

Report of Citizens' Advisory Committee.

Whereupon, the following was read by the Clerk:

February 24, 1925.

Owing to the fact that no provision has heretofore been made for the use and distribution of the Hetch Hetchy power crop, which is now about ready for delivery to San Francisco, your Advisory Board believes that certain principles and policies should be clearly set forth regarding the disposition of said power, pending the acquisition of a distributing system by the City, and therefore submits the following resolution which it respectfully recommends be considered and approved by your Honorable Board:

1. That the Railroad Commission of the State of California be and it is hereby respectfully requested to expedite, as much as possible, the evaluation of the distribution systems of the Pacific Gas and Electric and the Great Western Power companies, located within the City and County of San Francisco, and to employ the necessary force to accomplish this result.

of the Raker Act, pending the acquisition of a distribution system by the City and County of San Francisco, with the clear understanding that the said Raker Act does not permit the disposal of the said Hetch Hetchy power through any individual or private power corporation for resale.

4. That the Public Utilities Committee and the Finance Committee of the Board of Supervisors be and they are hereby authorized to jointly make the necessary investigations and report back to the Board of Supervisors, after conferring with the City Attorney, City Engineer and the Citizens' Advisory Committee, their recommendations for the use and disposition of the City's power, in accordance with paragraph three hereinabove set forth.

Mooring Mast for San Francisco.

Supervisor Badaracco presented: Resolution No. 23651 (New Series), as follows:

Whereas, it is expected that the Navy Department will issue orders in a few days for the giant dirigible "Shenandoah" to again visit this coast to participate in the March maneuvers of the combined fleets; and

Whereas, owing to the lack of mooring facilities when the "Shenandoah" was here last October, we lost our opportunity and failed to retain this dirigible because San Francisco had no mooring mast for her accommodation; and

Whereas, San Francisco's central location on the Pacific Coast, as well as her importance as the greatest shipping port on the west coast of the United States, has indicated this City as the logical base for airship operation in the event that this dirigible becomes a Pacific Coast fixture; therefore, be it

Resolved, That our Representatives in Congress be urged to use every effort to the end that a suitable appropriation be made at once for the construction of a mooring mast in San Francisco, and that this Board pledges itself to do everything necessary on its part to further this necessary and laudable project.

Further Resolved, In the event this dirigible is assigned permanently to this coast, that our congressional representatives be earnestly requested to make every endeavor with the Navy Department and the Federal Government to have the name of the "Shenandoah" changed to "San Francisco."

The following was read by the Clerk:

San Francisco, Calif.,

March 2, 1925.

To the Honorable Board of Supervisors, City Hall, San Francisco, California.

My dear friends:

I am leaving San Francisco tomorrow morning on the Overland Limited to visit my son "Jimmy," my wife and daughter in Boston, and expect to be absent from the City for about three weeks' time, a portion of which I shall spend in Washington, D. C.

I am ever mindful of your thoughtful solicitude for the recovery of my boy during his serious illness, which has been prolonged now for one hundred and nineteen days. I am happy to tell you that he is slowly recovering and that it is only a matter of a few weeks' time, according to his attending physicians, when his strength will

have been sufficiently restored to permit of his being brought home. I shall, of course, return to Boston to bring him home.

I thank you for your many thoughtful considerations of and comforting messages to Mrs. Rolph and myself, and send you this letter of appreciation on the eve of my departure, with "good-bye and good luck".

Very sincerely and respectfully yours,

JAMES ROLPH, JR.,

Mayor.

San Francisco, Calif.,

Hon. Board of Supervisors, City Hall, San Francisco, California. Gentlemen:

On the eve of my departure for the East I am reminded to call to the attention of your Honorable Board the wisdom of providing in

the 1925-1926 Annual Budget, upon which you will shortly begin work, an adequate sum for the further development of the Civic Center.

San Francisco's Civic Center is one of the finest architectural ensembles in the world and its fame is increasing steadily. There are, as you know, a number of improvements to be made to bring the Civic Center up to the highest degree of beauty, and I sincerely hope that progress toward the final goal will be made this year, the same as last.

In the hope that in your deliberations upon the budget your Honorable Board will bear the Civic Center strongly in mind, I am,

Very sincerely yours,

JAMES ROLPH, JR.,
Mayor.

To the Honorable Board of Super-

Gentlemen:

In behalf of the President and the Board of Directors of the San Francisco Chamber of Commerce, I beg to acknowledge receipt of your resolution passed last Monday commending the Chamber for its work and co-operative efforts with your body. We deeply appreciate these expressions from you, and we congratulate ourselves and the city that such a proper and intimate relation exists between the Board of Supervisors, which has such important and extensive official responsibilities, and the Chamber of Commerce, which unofficially must render important services to the community. As things are organized in American cities there are functions which the chosen representative organizations of the commercial community must exercise in order that the trade and all other interests of the city may go forward, and it is highly important that these duties should be performed in the closest co-operation and reconciled to the policies of the city itself, which must be entirely in your hands. The administration of the largest business enterprise in San Francisco is under your jurisdiction, and we desire to support you and be available to counsel with you in the discharge of your high obligations, which are so essential to the city's welfare and progress.

Respectfully yours,

ROBERT NEWTON LYNCH,
Vice-President.

Expressing Disapproval of Senate Bill No. 171, Relating to Holding of Annual Agricultural Fairs.

Supervisor Hayden presented:

Resolution No. 23726 (New Series), as follows:

Whereas, Senate Bill Number 171, now pending before the Legislature of the State of California, has for its object the holding of an annual agricultural fair at Riverside and requires the State Board of Agriculture to hold such fair in addition to the annual fair customarily held in the City of Sacramento; and,

Whereas, the State Fair has been held in the City of Sacramento each year for the period of sixty-five years and has become not only a State event, but an institution of nation-wide significance and importance; and,

Whereas, the City of Sacramento is the geographical center of the State of California and is easily accessible to all of the people of the State, and the annual fairs held thereat have been representative of the products of all portions of the entire commonwealth and not of a particular section; and,

Whereas, the holding of two annual State fairs, one at Sacramento and the other at Riverside, would result only in a division of the size, importance and interest of each and would seriously depreciate the value of the annual fair held for almost three-quarters of a century at the State Capital; now, therefore, be it

Resolved, That the Board of Supervisors of the City and County of San Francisco does hereby express its disapproval of Senate Bill No. 171 and urges the members of the Senate and Assembly representing San Francisco to assist in defeating the measure; and be it

Further Resolved, That a copy of this resolution be forwarded by the Clerk of the Board to each member of the San Francisco delegation in the Senate and Assembly.

Whereas, the City and County of San Francisco has discontinued the operation of the Hetch Hetchy Railroad as a common carrier; and

Whereas, the California Peach and Fig Growers, a co-operative incorporated association, has a considerable quantity of lumber, equipment and other supplies situated at Mather and Buck Meadows, on the line of the Hetch Hetchy Railroad, which they desire to remove to the San Joaquin Valley upon terms expressed in this ordinance; and

Whereas, the City Engineer has recommended that the Board of Supervisors authorize a contract permitting the removal of said lumber and other freight to be made on certain conditions; now, therefore,

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The Board of Public Works is hereby authorized and directed to enter into a contract with the California Peach and Fig Growers, a corporation, for the temporary joint use of the Hetch Hetchy Railroad, which contract shall embody the following terms and conditions, and any other conditions which the Board of Public Works may deem essential for the protection of the City's interest in operating said railroad.

1. That the City permit the California Peach and Fig Growers, a corporation, to use jointly with the City the tracks of the Hetch Hetchy Railroad between Mather and Hetch Hetchy Junction, including switches and spur tracks for the purpose of transporting from Mather to Hetch Hetchy Junction some 3,000,000 board feet of lumber, more or less, now stocked at Mather, and also 500,000 board feet of lumber now situated at Buck Meadows, together with the mill and logging machinery, equipment and supplies now situated at Mather.

2. Said corporation shall, at its own expense, make such repairs to the track and structures of the Hetch Hetchy Railroad between Mather and Groveland as may be necessary for the safe operation of trains over these tracks; and during the period that this agreement is in force and effect likewise at

its own expense, maintain the said track and structures in safe operating condition, for which purpose it agrees to employ continuously not less than two section crews, each consisting of a foreman and eight men.

3. The City will provide for the normal maintenance of tracks from Groveland to Hetch Hetchy Junction for such period of the contract as it may continue to operate steam trains over said tracks. Whenever the City notifies said corporation that it has discontinued the use of steam trains, said corporation shall thereupon and thereafter provide the necessary track maintenance. All extraordinary repairs between Groveland and Hetch Hetchy Junction made necessary as a result of the operations of said corporation, whether due to derailments or other accidental causes, shall be made by or at the expense of said corporation.

4. Said corporation shall employ the necessary labor and operate and handle its trains over the tracks of the Hetch Hetchy Railroad at its own responsibility, risk and expense. Such operation shall be subject to all rules, regulations and orders of the Hetch Hetchy Railroad relative to movement of trains.

5. Said corporation shall reimburse the City for any additional expense which it may incur in connection with the operation of its trains due to delays for which the City is not responsible, but which are due to obstruction of traffic by said corporation's trains whether due to derailment, breakdown of equipment, stalling of trains or improper operation.

6. Said corporation will be permitted to use jointly with the City the water tanks and fuel tanks of the City under equitable operating arrangements which will protect the interests of both parties.

The City will, upon proper request from said corporation, make such repairs to said corporation's operating equipment as the available shop facilities may warrant, subject to priority in time of the City's own requirements. Said corporation shall pay the charges for such repairs, which charges shall be based on the cost to the City, including established percentage for shop overhead.

7. Said corporation shall carry compensation insurance for all employees. All employees shall be experienced in the line of their particular duties and shall be subject at all times to the rules and regulations governing employees of the

Hetch Hetchy Railroad. Men observed to be incompetent, insubordinate, or undesirable characters, shall, upon request of the superintendent of the Hetch Hetchy Railroad, be discharged.

8. Said corporation shall assume liability for all damage to the Hetch Hetchy Railroad or adjoining property resulting from fires which may be caused by said corporation's equipment or employees and shall also save the City harmless from any personal injury or property damage claims resulting from the operation of said corporation's trains.

Each party shall be responsible for accidents resulting from the negligence of its own employees handling the trains; but if accident is caused by the joint negligence of employees of both parties, each party shall assume loss or liability for its own damage resulting from such an accident. In fixing responsibility for loss or liability, the train dispatcher shall be considered as a joint employee of both parties and accidents resulting from his negligence shall be treated as an accident due to joint negligence, as hereinabove defined.

9. Said corporation shall furnish to the City a surety bond in the amount of \$25,000, conditioned upon the faithful performance of this agreement.

10. Said contract shall be terminated as soon as said lumber and equipment are removed, and in any event, not later than July 31, 1925, provided that if prior to that date the City should discontinue the operation of all trains on the Hetch Hetchy Railroad except one train a day, said corporation shall assume all expense of dispatching in connection with the operation of the railroad.

Section 2. The Board of Public Works is hereby authorized and directed to supervise the carrying out of the foregoing agreement and to take all steps necessary to protect the City's property and interests in the operation of the same.

Disposal of Hetch Hetchy Power.

The following was presented, read and ordered *spread in the Journal*:

Mayor's Office,
San Francisco.

San Francisco, Cal.

March 30th, 1925.

Hon. James Rolph, Jr., Mayor;
Hon. Board of Supervisors; Citizens' Advisory Committee, San Francisco, California.

Gentlemen:

The Hetch Hetchy power issue is again before us. About a month ago this Board, by a vote of 10 to 7, authorized the Public Utilities and Finance Committees of the Board of Supervisors to negotiate for a temporary disposal of Hetch Hetchy power, commencing when the power line is completed to Newark. This resolution was vetoed by the Mayor, under advice of the Hetch Hetchy Advisory Committee. It was then deemed expedient to advertise for bids for the disposal of this power, in the hope that some means of disposal might develop other than the only visible one of dealing with existing plants.

This has produced no results.

Any arrangements which the City may make for the temporary disposal of this power will insure an income to the City for the time being at least of \$2,000,000 per annum. Such a sum would permit of many major and urgently needed public improvements and would ease the situation confronting us as to street repair, the necessity of more schoolhouses and playgrounds, the demand for better street lighting or extensions of the Municipal Railroads. One or more of these activities could make highly ad-

vantageous use of these two millions annually, or by doing without the advancement such a sum would make possible, the money could be used to hold down the necessarily growing tax rate.

All of these matters have been given careful consideration by me and the other nine members of the Board who voted to negotiate for the temporary disposal of Hetch Hetchy power after ascertaining from Mr. Searles, our special attorney on Hetch Hetchy, that a legal contract could be made.

The Mayor, the Advisory Committee and seven members of the Board are on record as opposed to the policy, as recommended by the Finance Committee, of a temporary disposal of the electric energy that will soon be available.

I feel that we must now look to the Mayor and his Advisory Committee and those members of the Board who endorse the Committee's views for the practical plan of power disposal which, obviously, they must have had in mind when they opposed the Finance Committee's recommendation.

Certainly they would not have all of this power go to waste, but would afford San Francisco the opportunity of doing all of the things for the City's benefit which it is possible to do with two million dollars a year.

My associates and I shall be pleased to receive that plan from the Mayor's representatives or from the members of the Board of Supervisors who have opposed the temporary (and by this I mean only temporary) disposal of Hetch Hetchy power in accordance with the Raker Act.

Very truly,

(Signed) RALPH McLERAN,
Acting Mayor.

Hearing of Protests, Eureka-Sunset Tunnel.

Hearing of protests against proposed Eureka-Sunset Tunnel:

The hearing of protestants against the Eureka Tunnel was resumed, Mr. A. E. Nathanson speaking first. He opposed paying an assessment for the construction of any tunnel. Mrs. Rose also protested against paying for a tunnel which she can't see will benefit her.

Dr. M. J. McGranaghan spoke at length, favoring the construction of the Eureka Tunnel.

Mr. George E. Hill and Mr. Hess, Chairman of the Transportation Committee of the Eureka Valley Promotion Association, urged the immediate approval of the Eureka Tunnel.

Mr. Becker, president of the Eureka Valley Promotion Association, stated that his assessment is 17½ cents a square foot, possibly the highest in the district, but he is willing to pay it in order to get the tunnel through.

Mr. Davies and U. S. Hanbridge favored the Eureka Tunnel for the benefit of the Haight and Ashbury District and the Pope Tract.

Mr. Sloan suggested the installation of buses similar to those in use in London, as a solution of the transportation problem for the Pope Tract.

Mr. E. J. Tracey said he is for the Duboce Tunnel and is willing to help pay for it.

Further action in the matter of the Eureka Tunnel was continued for one week. In the meantime, Attorney McKannay was instructed to prepare two resolutions, one approving the assessment district as outlined by the City Engineer and overruling the protests of the property owners and the other sustaining the objections of the property owners so that the Board may have both resolutions before it to consider and determine.

Action Deferred.

Thereupon, further consideration of the pending matters, on motion of Supervisor Colman, were made a special order of business Monday, April 6, 1925, at 3 p. m.

Authorizing Use of Hetch Hetchy Railway for Moving Lumber, Freight, Etc.

Bill No. 7039, Ordinance No. 6566 (New Series), as follows:

Authorizing the Board of Public Works to enter into an agreement with the California Peach and Fig Growers, a corporation, for removal of lumber and other freight belonging to said corporation over the Hetch Hetchy Railroad.

Whereas, the City and County of San Francisco has discontinued the operation of the Hetch Hetchy Railroad as a common carrier; and

Whereas, the California Peach and Fig Growers, a co-operative incorporated association, has a considerable quantity of lumber, equipment and other supplies situated at Mather and Buck Meadows, on the line of the Hetch Hetchy Railroad, which they desire to remove to the San Joaquin Valley upon terms expressed in this ordinance; and

Whereas, the City Engineer has recommended that the Board of Supervisors authorize a contract permitting the removal of said lumber and other freight to be made on certain conditions; now, therefore,

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The Board of Public Works is hereby authorized and directed to enter into a contract with the California Peach and Fig Growers, a corporation, for the temporary joint use of the Hetch Hetchy Railroad, which contract shall embody the following terms and conditions, and any other conditions which the Board of Public Works may deem essential for the protection of the City's interest in operating said railroad.

1. That the City permit the California Peach and Fig Growers, a corporation, to use jointly with the City the tracks of the Hetch Hetchy Railroad between Mather and Hetch Hetchy Junction, including switches and spur tracks for the purpose of transporting from Mather to Hetch Hetchy Junction some 3,000,000 board feet of lumber, more or less, now stocked at Mather, and also 500,000 board feet of lumber now situated at Buck Meadows, together with the mill and logging machinery, equipment and supplies now situated at Mather.

2. Said corporation shall, at its own expense, make such repairs to the track and structures of the Hetch Hetchy Railroad between Mather and Groveland as may be necessary for the safe operation of

trains over these tracks; and during the period that this agreement is in force and effect likewise at its own expense, maintain the said track and structures in safe operating condition, for which purpose it agrees to employ continuously not less than two section crews, each consisting of a foreman and eight men.

3. The City will provide for the normal maintenance of tracks from Groveland to Hetch Hetchy Junction for such period of the contract as it may continue to operate steam trains over said tracks. Whenever the City notifies said corporation that it has discontinued the use of steam trains, said corporation shall thereupon and thereafter provide the necessary track maintenance. All extraordinary repairs between Groveland and Hetch Hetchy Junction made necessary as a result of the operations of said corporation, whether due to derailments or other accidental causes, shall be made by or at the expense of said corporation.

4. Said corporation shall employ the necessary labor and operate and handle its trains over the tracks of the Hetch Hetchy Railroad at its own responsibility, risk and expense. Such operation shall be subject to all rules, regulations and orders of the Hetch Hetchy Railroad relative to movement of trains.

5. Said corporation shall reimburse the City for any additional expense which it may incur in connection with the operation of its trains due to delays for which the City is not responsible, but which are due to obstruction of traffic by said corporation's trains whether due to derailment, breakdown of equipment, stalling of trains or improper operation.

6. Said corporation will be permitted to use jointly with the City the water tanks and fuel tanks of the City under equitable operating arrangements which will protect the interests of both parties.

The City will, upon proper request from said corporation, make such repairs to said corporation's operating equipment as the available shop facilities may warrant, subject to priority in time of the City's own requirements. Said corporation shall pay the charges for such repairs, which charges shall be based on the cost to the City, including established percentage for shop overhead.

7. Said corporation shall carry compensation insurance for all employees. All employees shall be experienced in the line of their par-

ticular duties and shall be subject at all times to the rules and regulations governing employees of the Hetch Hetchy Railroad. Men observed to be incompetent, insubordinate, or undesirable characters, shall, upon request of the superintendent of the Hetch Hetchy Railroad, be discharged.

8. Said corporation shall assume liability for all damage to the Hetch Hetchy Railroad, or adjoining property resulting from fires which may be caused by said corporation's equipment or employees and shall also save the City harmless from any personal injury or property damage claims resulting from the operation of said corporation's trains.

Each party shall be responsible for accidents resulting from the negligence of its own employees handling the trains; but if accident is caused by the joint negligence of employees of both parties, each party shall assume loss or liability for its own damage resulting from such an accident. In fixing responsibility for loss or liability, the train dispatcher shall be considered as a joint employee of both parties and accidents resulting from his negligence shall be treated as an accident due to joint negligence, as hereinabove defined.

9. Said corporation shall furnish to the City a surety bond in the amount of \$25,000, conditioned upon the faithful performance of this agreement.

10. Said contract shall be terminated as soon as said lumber and equipment are removed, and in any event, not later than July 31, 1925, provided that if prior to that date the City should discontinue the operation of all trains on the Hetch Hetchy Railroad except one train a day, said corporation shall assume all expense of dispatching in connection with the operation of the railroad.

Section 2. The Board of Public Works is hereby authorized and directed to supervise the carrying out of the foregoing agreement and to take all steps necessary to protect the City's property and interests in the operation of the same.

Section 3. This ordinance shall take effect immediately.

Death of Rev. Father Peter C. Yorke.

The following resolution was presented by Supervisors Welch, Shannon and Schmitz and adopted unanimously by a rising vote:

Resolution No. 23853 (New Series), as follows:

The Board of Supervisors, speaking for the people of San Francisco, learns with deep regret and sorrow of the death of the Reverend Father Peter C. Yorke. Father Yorke's name is written in enduring terms in the history of San Francisco. He came to this city from his home in Ireland when a young priest and practically all his life has been identified with the people of this community. In his activities as a priest he was beloved by his congregation. In his efforts for public welfare he was indefatigable, striving to promote the interest of the working people. He was one of the leaders with noted prelates of all creeds in espousing the cause of religious freedom. No man brought greater attainments to serve re-

ligion and the people than did the late Father Yorke. His passing is an irreparable loss.

As a mark of respect when the Board adjourns today it shall be out of respect to the memory of the deceased priest.

Report of Law and Legislation Committee on Proposed Amendment to Act Providing for Incorporation, Organization and Management of a Bridge and Highway District, Bill Known as Assembly Bill No. 1288.

The Law and Legislation Committee met Senator Coombs, Mr. Hotchkiss, Mr. Doyle and Mr. Harland, Supervisors of Napa County, and members of the association, on April 5, at Napa, California, and it was unanimously agreed that in fairness to the City and County of San Francisco that paragraph 4 of the act should be amended. The act now affords any county of forty thousand or less one member of the board of directors; two members for a county having a population of over forty thousand and not more than one hundred thousand; three for counties having a population of more than one hundred thousand and less than five hundred thousand, and five for counties having a population of five hundred thousand and over. The amendment agreed upon was to give San Francisco—that is, counties of over five hundred thousand—a number of directors equal to the number of directors of all counties under five hundred thousand.

The present act makes no provision for removal of directors, and it was further agreed that an amendment for the removal of directors be made and that such removal be for cause.

Section 23 provides that any county not a member of the association may be added to the district by that county voting itself into the district at any time before or subsequent to the formation of the district. This section was amended so that such other counties might come into the district only upon the consent of the board of directors.

The committee met at various times and has discussed the matter with members of the board and the committee believes that it is to the best interests of San Francisco and to Northern California that the

City and County of San Francisco enters the district, and we recommend the passage of an ordinance in compliance with the said Coombs Act.

Confirming the Sale of Land Owned by the City and County of San Francisco.

Bill No. 7044, Ordinance No. — (New Series), as follows:

Whereas, by Ordinance No. 6494 (New Series), approved January 28, 1925, the Board of Supervisors determined that public interest and necessity demanded the sale of the land hereinafter described, subject to a lease bearing date July 1, 1909, and recorded in the office of the Recorder of the City and County of San Francisco July 10, 1909, in liber 28 of Leases, page 345, and by said ordinance directed the Mayor of the City and County to sell all of said land at public auction, to be held on Monday, March 2, 1925, and directed that notice of said sale be given for three weeks successively next before the sale, as required by law; and

Whereas, the Clerk of the Board of Supervisors thereafter proceeded to publish notice of said sale in the official newspaper and one other daily newspaper published in the City and County for three weeks successively next before said sale was directed to be made, describing the land to be sold therein with common certainty and stating the

date on which said sale would be made, as specified in Ordinance No. 6494 (New Series), and that all bids or offers would be received by the Mayor at the chambers of the Board of Supervisors, in the City Hall, City and County of San Francisco, State of California, on Monday, March 2, 1925; and

Whereas, the Mayor, the Assessor and the chairman of the Finance Committee, being the Board of Appraisalment constituted by the Charter of the City and County of San Francisco for such purpose, thereafter duly met and made an appraisalment of said land and fixed the fair value thereof at the sum of \$54,600, and reported said appraisalment to the Board of Supervisors in writing; and

Whereas, Thereafter, and on the second day of March, 1925, at public auction, the Mayor sold said property to H. S. Young for the sum of \$64,000, and accepted from said H. S. Young a deposit in the amount of \$6,400, being ten per cent of the amount bid, and thereafter and at the next meeting of the Board of Supervisors, March 9, 1925, duly notified the Board of Supervisors in writing of the fact of such sale, stating the sum bid, the name of the bidder, and requesting that the Board confirm the sale; and

Whereas, the Clerk of the Board of Supervisors immediately thereupon proceeded to give notice by publication in the official newspaper and one other newspaper published in the City and County of San Francisco for a period of twenty days from and after the 12th day of March, 1925, that at a meeting of the Board of Supervisors to be held on the 6th day of April, 1925, the matter of said sale would come up for confirmation, stating also in said notice the fact of the sale, the amount for which the property had been sold as aforesaid, and the name of the purchaser, and also stating that if at such meeting on the 6th day of April, 1925, an offer of ten per cent more in amount than that named in said notice should be made to the Supervisors in writing by a responsible person, the Supervisors would confirm such sale to such person, or order a new sale; and

Whereas, the date of confirmation specified in said notice has now arrived and a higher bid has not been obtained, and it appearing to the Board of Supervisors that the sum of sixty-four thousand (\$64,000) dollars bid as aforesaid by H. S. Young is not disproportionate to the value of the property sold, and

that a greater sum cannot be obtained; therefore,

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. That said sale of the said land hereinafter described to H. S. Young for the sum of sixty-four thousand (\$64,000) dollars is hereby ratified, approved and confirmed and the Mayor and the Clerk of the Board of Supervisors are hereby authorized to execute and deliver to said purchaser, upon payment of the balance of the purchase price, a good and sufficient conveyance in the name of the City and County of San Francisco, conveying to H. S. Young all the right, title and interest of the City and County in and to the land sold as aforesaid, and more particularly described as follows, to-wit:

Section 2. The City Attorney is hereby directed to prepare the necessary conveyance and supervise the delivery of deed upon payment of purchase price as aforesaid.

Section 3. This ordinance shall take effect immediately.

And from the evidence so taken at said hearing as aforesaid, the Board now finds, ascertains, determines and decides that the said assessment proposed by the said re-

port of said Board of Public Works (as so modified as aforesaid) and as hereinafter levied, is in each and every case and in respect to each and every of the several parcels or subdivisions of land within the said district of land benefited by said tunnel construction estimated and made and levied in proportion to the benefits which said several and respective parcels or subdivisions will receive from said proposed work;

And that the map constituting Part III of said report showing said district of land and also the subdivisions of the property therein, each of which subdivisions is given upon said map a separate number, and the list constituting Part IV of said report (as modified as aforesaid) referring to said subdivisions on said map by the respective numbers thereof and showing an estimate of the benefits which each of said subdivisions or parcels will receive from and by the construction of such tunnel, shall be and constitute the assessment made and levied for defraying the damages, costs and expenses of such tunnel construction and for defraying the damages and compensation allowed and awarded to the owner or owners or persons interested in the property affected by said acquisitions.

And the amount of the benefits set opposite each parcel of land therein (as modified as aforesaid) shall constitute and is the amount of the assessment hereby levied thereon;

Be it Further Resolved, That the assessments made and levied as aforesaid for defraying the damages, costs and expenses of said tunnel construction and for defraying the damages and compensation allowed and awarded to the owner or owners or persons interested in the property affected by said acquisitions may be paid in annual installments as in said "The Tunnel Ordinance" provided, that is to say: Each of said assessments may be paid in ten (10) equal installments, with interest on deferred payments as in said ordinance and hereafter provided, upon condition that the owner or owners of such property shall make, execute and deliver the agreement provided for by Section 17 of said "The Tunnel Procedure Ordinance" and otherwise comply with all of the provisions and requirements of said ordinance in that behalf, the first of which installments shall be paid at the time of the application to the Tax Collector for such agreement.
